VOLUME 9. MARYVILLE, MISSOURI WEDNESDAY, MAY 21, 1919 NO. 298

SUGGEST $65,000 WATER BOND ISSUE

MOTION BROUGHT BY M. E. FORD FOR IMPROVEMENT OF SYSTEM

HARPER OUTLINES PLAN

Plan Endorsed by Nearly 100 Citizens at Rousing Meeting Last Night.

Principal Features.

Following are the features of the new water plant improvements and the report which was read by Mr. Harper:

Storage at plant increased from 8 to 40 million gallons.

New concrete coagulating plant to be constructed to properly prepare the water for filtration.

Basins 1 and 2 to be lined with concrete.

New intake to be built on river bank.

Motor driven pumps to be installed at river, but steam plant kept in repair for emergency use.

Concrete reservoir to be built in town, capacity 300,000 gallons and special motor driven fire pump, capacity 1,000 gallons per minute at 100 pounds.

pressure to be installed at this reservoir to provide direct pressure for fires

Repairs to dam.

Fire protection to Normal.

Filter repairs.

The first step toward the realization of an efficient water plant for Maryville, fully adequate to supply the three essential demands of quantity, quality and sufficient fire protection, was taken at the meeting last night at the Christian church at which nearly a hundred citizens gathered to thresh out the problem and hear the plan suggested by E. E. Harper, the consulting engineer from Kansas City. Near the close of the meeting, a motion was brought by M. E. Ford, a member of the former Board of Public Works, for a $65,000 bond issue to carry the project. By a standing vote the citizens showed that they were unanimously in favor of the move.

In presenting the motion, Mr. Ford spoke of the water problem which came before the Board of Public Works six years ago when the present plant was taken over from private ownership by the city at a cost of $50,000. A $100,000 bond issue was voted at that time to cope with the water situation, which, after the plant had been purchased, left $50,000 for the improvement of the system. Mr. Ford stated that the amount was insufficient to carry the work on properly and that the Board of Public Works was able to make only a limited number of the improvements which were necessary. "The big trouble which has always come up in connection with this problem," said Mr. Ford, "has been the lack of money to do things with. I have been interested in the water question for many years, and numerous plans have been presented for the improvement of the plant, but without the necessary cash, the men in charge have been unable to make the changes. The suggestion that $50,000.00 be raised through the issuance of bonds would probably be sufficient to make the absolutely necessary improvements but there are other improvements which should also be made at this time, such as the extension of the system and repairs to the city mains. I am certain that at least $65,000 would be necessary. If there is a little left over it can be used for emergency purposes." Mr. Ford showed that continual makeshift changes and repairs in the system were insufficient and expensive to the city, and that the only logical way to deal with the problem would be to rebuild the plant upon efficient lines once and for all.

Engineer Harper's Report

State Historical Society COLUMBIA

The Honorable M... Council,
Maryville Missouri.
Gentlemen:

I submit the following ...with preliminary plans and estim... ing to the construction of i... ments to your water works syste...

In this report I desire to call your attention briefly to certain important features in connection with your water supply, water purification, method of pumping and fire protection facilities, all of which have been considered in preparing the plans and estimates submitted herewith.

Water Supply.

In considering the question of a water supply, I think it should be approached with the idea in view that it is a poor policy to make any extensive expenditures either on a source of supply or a location that can not be considered as permanent.

I am thoroughly satisfied that you are using the proper source of supply, and in view of improvements and expenditures already made, I think it will be desirable to continue with the present location of the plant for the future.

At the present time you have very little storage, (only about 8 million gallons) outside of the river, and this is not sufficient to carry over long periods of excessive drotuh, such as occur perhaps every 8 or 10 years.

Therefore I recommend that you increase the storage capacity by cleaning and enlarging the present No. 3 reservoir so that it will hold 18,000,000 gallons, and that you construct, on land owned by the city just north of the present reservoir, another reservoir with a capacity of 21,000,000 gallons.

The accompanying plans show in detail how it is proposed to do this work, and these two reservoirs will give you, in connection with the two small basins, a storage of 40 million gallons of water, or five times the present storage.

The present consumption of water is about 350,000 gallons per day, and making liberal allowances for evaporation and seepage this 40 million gallon storage will last the city, at the present rate of consumption, about 90 days, with no water pumped from the river at all.

However we can always count on PART of the necessary supply, at least enough to care for the evaporation and seepage from the reservoirs, from the river, even in the dryest of weather, so as a matter of fact, the proposed storage will be sufficient to care for the city's requirements for even more than 3 months, at the present rate of consumption.

Moreover this large storage will permit the heavy sediment to settle out of the water, and will make it unnecessary to prepare muddy water for filtration, as is the case at the present time.

As a matter of fact, it should never be necessary to pump any real muddy water into these storage basins, for they are so large that the proper thing to do is to use the water from these reservoirs when the river is muddy, and do no pumping from the river to the reservoirs till the river water is fairly clear.

With this plan of operation, there should be no filling up of the reservoirs with sediment from the river as has been the case with the present small reservoir.

Intake Well.

To insure that the obtaining of the water supply from the river shall not be interrupted, it is advisable to construct a small intake well on the river bank, so arranged that the suction lines leading to the pumps can always be readily inspected, and repairs made on foot valves, screens, etc., at any time. Plans for this intake well have already been submitted to you.

Coagulating Plant.

Before any water can be successfully and economically filtered, it must be prepared for filtration by the addition of the proper coagulants, which must be thoroughly mixed with the water for a period of from 10 to 30 minutes, after which the water is allowed to settle for several hours before going to the filters.

This is one thing that is very badly needed, for at the present time the facilities for doing this work are only of a temporary nature, and are quite inadequate. This is one of the improvements contemplated herein.

New Pumping Equipment.

The present low service pumps which are of the centrifugal type, driven by small steam engines, and used for pumping from the river to the basins, must soon be replaced, as the engines are badly worn, and the pumps are pretty well worn, too.

I recommend that you remove one of these pumps, and replace it with a motor driven centrifugal pump, to be used to pump from the river to the basins, this pump to have a capacity of about 600 gallons per minute. Repair the other engine driven unit, and hold it in reserve for emergency use.

To pump to the city I believe you will find it advisable and economical to install a motor driven centrifugal pump, to pump at the rate of about 400 gallons per minute through the filters to the city.

The installation of these two pumps will permit you to do all the pumping electrically, and this will permit you to dispense with one engineer at the plant, and do all the work with one man.

However, I do not advise that you dispense with the steam equipment but that you hold it in reserve, keeping it in working order by using it a few hours a week, so that in case of accident to the motor driven pumps or the transmission lines, the steam pumps can be operated as at present.

It will not be feasible to furnish increased pressure, in case of fire, with the motor driven pumps to be installed at the plant, but this feature is taken care of in another way, as will appear later on in this report.

Fire Protection.

At the present time the fire protection is furnished either by direct pressure from the plant, or from the pressure of the 150,000 gallon tank, located on a tower in the city, at such a height that when full the pressure in the business district is about 50 pounds.

There is an eight inch pipe line now leading from the pumping plant at the river to the city, and the length thereof to where this pipe branches and connects to the mains in the city is about 7,000 feet.

When pumping at the ordinary rate, the pressure at the plant is now about 140 pounds per square inch, or about the safe working strength of this pipe line, and this is when pumping at the rate of about 500 gallons per minute.

Now 500 gallons per minute is not enough water to furnish fire protection, when pumping direct, but if even this small quantity is supplied at a pressure of 100 pounds in the city, it will require about 190 pounds pressure at the plant, which is not safe, but likely to burst the 8 inch main at any time.

Moreover the quantity of 500 gallons per minute is too small and if this be increased to 700 gallons per minute, which is the maximum carrying capacity of the 8 inch main, the pressure at the plant would have to be increased to about 230 pounds at the plant, which is more dangerous than ever.

In other words, it is entirely out of the question to furnish adequate pressure for fire protection, even when the standpipe is full, to say nothing about when it is only half full or less.

There are two methods by which better fire protection may be obtained, as follows:

1st. Keep the present steam plant in operation, with fires banked at night and depend on direct pressure from the river, in which case it will be necessary to lay an additional pipe line from the river to town, not less than eight inches in diameter, but preferably ten inches in diameter, of extra heavy pipe. An 8 inch line 7,000 feet long will cost $16,000 and a 10 inch pipe, $21,000.

2nd. Install a storage reservoir in the city with a supply of say 300,000 gallons of water, with a special motor driven fire pump against 100 pound pressure, to be used to furnish direct pressure for fires.

Reservoir and Fire Pump in City.

The last method above mentioned appears to me to be the most desirable for several reasons.

In the first place, it provides the storage of water for fire protection, IN THE CITY, not two miles away.

Secondly, it does away with exceedingly high and dangerous pressures in the pipe line from the city to the river.

Third, the cost is less than any other scheme.

It has been suggested that another large elevated tank might be built in the city, but the cost of such a tank if installed at a height to give good fire pressure, would be prohibitive, and such a structure is in itself always exposed to some hazards such as storms.

The city now owns a large tract of ground in the rear of the present fire department building, and this provides

(Continued on page 2)

PLAN SALVATION ARMY DRIVE HERE

LEADERS OF CAMPAIGN FOR N. W. MISSOURI VISIT HERE YESTERDAY

ELKS SPONSOR CAMPAIGN

Drive to Be Made June 9-16—$3,000 Quota for Nodaway—Langford Talks at Meeting.

Dr. Charles F. Roach, of Kansas City, and W. H. Langford, of Joplin, were in Maryville yesterday making preliminary arrangements for the Salvation Army drive for funds which is to be conducted June 9-16 throughout the United States. The two men are not connected with the organization but are working for the drive under the direction of B. E. Corliss, campaign director for Western Missouri.

The district of western Missouri has been assigned a quota of $51,000 and the quota for Nodaway county has been placed at $3,000. The city of St. Joseph will attempt to raise $65,000 and plans are being made for the erection of a Salvation Army building at that place.

The Elks Lodge throughout the country is sponsoring the Salvation Army drive and arrangements were made last night whereby the local lodge of the Elks are to have charge of the work here.

Both Dr. Roach and Mr. Langford attended the dinner and meeting held last night for the purpose of discussing the water question, and a five minute talk was made by Langford, in which he pointed out the object of the drive and the work which the Salvation army is attempting to do. Langford has a son who was in the aviation service overseas, and is in a position to know some of the great good done by the organization for the soldiers. "The Salvation Army has discontinued the Tambourine method of solociting," he said and are resorting to the budget system of raising their funds. Every soldier who has been in the trenches will vouch for the good work performed by the Salvation Army men and women. The cause is a worthy one and is deserving of hearty support."

"THE EYES OF THE WORLD"

At Empire Offers Something Different in Pictorial Drama From the Run of Great Film Offerings.

Departing from the merely spectacular and concentrating its essence into a powerful love story, gorgeous California scenic settings and elaborate musical attributes, "The Eyes of the World," at the Empire tomorrow and Friday nights, offers something different in pictorial drama from the run of great film offerings put forward of late. Represented in this achievement are Harold Bell Wright, author of the famous story, which has had a sale of over two million copies in book form, and W. H. Clune, who was associated in the production of "The Clansman" ("Birth of a Nation") and other large film ventures.

The noted author amplified the story for this production and personally assisted in the work of putting his characters on the screen. While "The Eyes of the World" is primarily a romance, it is melodramatic in the best sense, bristling with adventure, hazard and dramatice clash, as well as idyllic charm. The cinema version is in nine acts, was seven months in making at unlimited cost on the actual scenes of the story in Southeastern Califronia.

The qualities that gave the book such phenomenal sale are intensified in the pictorial version, which has a wealth of gorgeous photographic settings. The presentation is a lavish one in every way. In numerous cities it has broken all theater records.

Former Resident Dead.

Mrs. Will Hughes has received word of the death of her father, C. O. Turner, 78 years old, which occurred Saturday morning at Sacramento, Calif. Mr. Turner lived for thirty-seven years on a farm southwest of Maryville, and three years ago went to California for his health. Surviving him are five daughters, Mrs. Hughes of Maryville; Mrs. Wm. Hardesty, living south of Maryville; Mrs. Maud Rochelle, Mrs. Mabel Walsh and Mrs. Mame Osborne, all of Sacramento; and two sons, Ed and will Turner of Hebron, Neb.

BEER AND WINE PLAN PENDING

PRESIDENT'S PROPOSAL BIG TOPIC AT CAPITAL TODAY

DIFFERENCE OF OPINION

Republican Leaders of Senate and House to Hold Conferences to Decide Action on Matter.

Washington, May 21.—President Wilson's proposal that congress repeal that part of war-time prohibition law affecting wines and beers is the all absorbing topic at the capital today. Until the Republican leaders of the senate and house had had time to thresh out the subject, it is stated they would not be prepared to determine whether or not to follow the president's suggestion that the war-time ban on the manufacture and sale of wines and beers be removed.

It is planned to hold a series of conferences before the week-end and it is hoped to be able to map out course for the Republican majority to pursue in both houses.

It was said a wide-spread difference of opinion persisted among the Republican and Democratic senators and representatives as to the changes of congress lifting the embargo.

Washington, May 21.—Full information of the Senate on all affairs was promised by President Wilson today. The President sent a cable to Acting Secretary of State Polk through Secretary Tumulty, acknowledging the receipt of the Senate's notification that it had convened. He hopes to be soon in Washington to communicate to them the full information on international affairs.

DISCOVERED--IDENTITY OF MYSTERIOUS AIRMEN

Army Men Make Fast Flight From Belleville, Ill., to York, Neb.—Maryville on Route.

The identity of the mysterious aviator who flew over Maryville about 12:30 Sunday afternoon in an army plane has been discovered—he was Lieut. G. H. McKay, U. S. A., and was accompanied by Sergt. C. M. Bentley, another army man. Following is an account of the trip and destination:

York, Neb., May 19. Lieut. G. H. McKay and Sergt. C. M. Bentsen, army aviators, assigned by the war department to make exhibition flights at the Nebraska G. A. R. encampment, which opens here tomorrow, made a fast flight from Belleville, Ill., to this place, covering the distance of 550 miles in five hours and forty-five minutes actual flying time. Leaving Belleville at 6:15 this morning they stopped at Chillicothe, Mo., for oil and lunch, that being their only stop until they reached York at 3 p. m. They maintained an altitude of about 3,000 feet.

FORMER BOSTON GIRL DIES IN PARIS.

Paris, May 21.—Lady Paget, formerly Mary Stevens of Boston, died at the Hotel Ritz last night following an attack of pneumonia, preceded by influenza.

Hopkins Woman Dies.

Funeral services for Mrs. Thompson, who died at her home, five miles north of Hopkins, were held yesterday afternoon at the Baptist church, and were conducted by Rev. R. R. Watts. Mrs. Thompson was 53 years old, and is survived by five children. A brother, John Hubbell and wife of Barnard, atatended the funeral.

El Reno Teachers Return.

Miss Esther Dietz and Miss Janette Mutz returned Monday night from El Reno, Okla., where they have been teaching the past year. Miss Mary Lewis and Misses Hazel and Mary Wallace, who also taught in the El Reno schools, will return to Maryville the latter part of the week.

Prayer Meeting Topic.

Rev. W. C. Ferguson, pastor of the First Baptist church, will have for his prayer meeting topic tonight, "If Ye Abide in Me," John 15:7. The meeting will begin at 8 o'clock.

To Teach Blackman School.

Miss Maud Whitehead, who has been teaching the Bell Grove school, has been hired to teach the Blackman school the coming year at a salary of $90 a month.

NC-4 IS HELD UP AT PONTA DEL GADA TODAY

Engine Trouble Makes It Improbable That Plane Will 'Hop Off" For Portugal Coast.

Washington, May 21.—NC-4 was unable to hop off from Ponta Delgada for the coast of Portugal today. The navy department received a message from Admiral Jackson this morning stating one of the engines of the plane is not functioning properly.

BOLSHEVIK ARMY IN BIG BATTLE

Major Part of Red Forces Sent Against Admiral Kolchak—Make Counter Offensive.

Paris, May 21.—Bolsheviks are concentrating a major part of their military forces against Admiral Kolchak and a great battle is in progress, east of Kolga, according to wireless sent out by the Bolshevik foreign office. Bolshevik admit retirement on Archangel-Nurman-Sk Daras fronts in wireless but add counter offensive is now going on with favorable results.

DEFINITE ACTION BY GOV. ON SCHOOL APPROPRIATION

Gardner Will Either Hold Up or Veto Outright 20 Per Cent of Appropriation—Totals $500,000.

Jefferson City, May 21.—Unofficially it is learned that Governor Gardner wil either hold up or veto outright 20 per cent of the appropriations made by the legislature for the State University, School of Mines, Lincoln Institute and the five State Normal Schools.

The educational bill as it passed the general assembly totalled approximately $3,000,000, so the "trimmings" from the various institutions covered by the bill will total nearly $500,000.

Announcement of the cuts will not be forthcoming for at least two weeks yet.

"WET OR DRY, WILL SELL BY FIRST OF JULY," SIGN READS.

"Wet or Dry, will sell by the first of July," begins a legend on a Sixth street sign in St. Joseph, hanging beneath a beer sign, and advertising to the passer-by for sale liquors that in the light of the Great Thirst to come, should be spoken of very respectfully, as soon to become very rare.

For the cafe, Hilgert's which for ten years has been a landmark on Sixth street below Edmond, a gathering place for livestock and commission men, where over the foaming brew men expanded and became jovial, and many a good story—and heads of cattle—oft changed hands, is for sale.

"What can we do," Michael Hilgert, the proprietor, himself a familiar figure in front of his cafe, alweays wearing a black skull cap, said in a tone of resignation last night. Then he brightened up. "I don't think the country will go dry. The people won't stand for it. If I were younger, I'd go back to the old country, Belgium."

Hilgert came to St. Joseph in 1888 from Maryville, and opened a cafe on Felix street in the store now occupied by Bell, the caterer. He moved into his present location ten years ago.

"Got anything on your hip" will soon be a very bold request, according to Hilgert, who looks forward to an extraordinary rise in the price of whisky. "There is no more whisky on the market, and the supply in stock is going to bring very high prices," he said.—St. Joseph Gazette.

Paul Chilton of St. Joseph, is visiting in Maryville with Mr. and Mrs. J. B. Robinson. He has been recently been discharged from the army, having served two years. He was overseas and was in the Argonne battle and several others.

Carl Wray and W. B. Torrance of Guilford, were in Maryville today. They said the Guilford chautauque would be held this year August 1, 2 and 3.

Mrs. J. M. Donahue and baby son of Superior, Wis., who have been visiting her mother, Mrs. Omer Catterson, have returned to their home.

GERMANS ASK TIME EXTENSION

CLAIM THEY HAVE NOT HAD TIME TO CONSIDER TERMS

48 HRS. LEFT TO DECIDE

Attempt to Create Feeling of Danger in Germany—"Feelers" Out for Allied Sentiment.

Paris, May 21.—The German delegation is understood to have presented an eleventh hour note demanding an extension of time, and adding that they can not sign the treaty now because they have not had sufficient time to consider it. This note is only one of a series which will be presented by the Germans for consideration by the allies within the next forty-eight hours, when the time limit expires. Tomorrow several meetings have been scheduled for Versailles.

The Germans are evidently trying to create the impression of grave danger in Germany and that the Ebert Scheidemann government may be overthrown within a few days. As a result they are throwing out feelers to find out if the Allies will be willing to sign the treaty with the Independent Socialists.

Paris, May 21.—President Wilson, Lloyd George and other members of the "big five" met this morning for the purpose of considering recommendations for certain changes in the treaty which will make it more acceptable to the Germans. Recommendations made by the French economic experts had to do with reparations. The German delegation sought to deny the German responsibility for the war in a note on reparation, which was rejected last night, it was learned today.

Copenhagen, May 21.—The German reply to the allied peace terms will be handed to the big four Thursday, said a Berlin dispatch today. Germany will say she cannot accept the economic terms imposed by the Allies and will state that Austria as ally during the war is equally responsible in making reparation.

PASS WOMAN SUFFRAGE BILL

Washington, May 21.—The Woman Suffrage Amendment passed the House this afternoon, 304 to 88.

Washington, May 21.—The passage of the Woman Suffrage amendment before nightfall was predicted when the House convened today. The leaders of both parties had virtually reached an agreement to bring the amendment to a vote by 6:30 tonight.

Gray Wolf Killed Near Maryville.

Delbert Ambrose and Robert Pittsenbarger, residing about 8 miles southeast of Maryville killed a gray wolf on the Pittsenbarger farm about 7 o'clock yesterday morning. The men were walking along the road when they saw the animal. Ambrose went to his home and secured a rifle and with one shot ended its life.

Miss Nina Bent left today for Kansas City, where she will meet Miss Georgie Evans, who is en route from El Reno, Okla., where she has been teaching, to Colorado.

Mr. and Mrs. R. Kuchs returned yesterday noon after over a week's absence. Mr. Kuchs was in Texas on a business trip and Mrs. Kuchs visited in Kansas City and Excelsior Springs.

Mrs. S. L. Beech and daughters left this morning for Rock Port, where they will make their home. Mr. Beech left yesterday with the household goods.

WEATHER FOR TODAY

Fair and continued cool tonight; Thursday fair, somewhat warmer in the east and south portions.

MEMBER MISSOURI PRESS ASSOCIATION

ENGINEER HARPER'S REPORT.

(Continued from page 1)

an admirable location for such a storage tank as I have mentioned.

This would be built of reinforced concrete, 60 feet in diameter; 15 feet deep, capacity of 300,000 gallons with a concrete roof, and would be connected so that it can be filled from the city mains and kept full of filtered water all the time.

The fire pump, motor driven, capacity 1,000 gallon per minute against 100 pounds pressure would be located in the basement at the rear of the fire department building, and in case of fire can be started by the firemen before leaving the building.

There is an underground lead from the Light Plant through which power can be furnished to the motor, which would free the power line from the hazard of overhead pole line construction, and insure safety on this point, while the mains in the business district are so located that proper connection can be made thereto at small expense.

I think this is an ideal solution of your fire protection problem, both from the point of economy and efficiency.

Relining Basins at River.

It is advisable, tho not absolutely necessary, to reline the two small basins at the river plant, preferably with concrete, as shown on the plans herewith. The present lining is of brick and is in bad repair, but it is only fair to state that relining the basins will make no particular improvement in the quality of water.

Repairs to Dam.

The present high water has cut away a large part of the bank on the east side, below the dam, and there is immediate danger of the water cutting around this east end of the dam.

To make proper repairs, it will be necessary to drive a lot of piling below the dam, and use considerable riprap to protect the bank from further erosion.

Piling should also be driven to prevent a similar occurance on the west side of the river, below the dam, and a few piles should also be driven above the dam on the west side.

Repairs to Filter Plant.

The filters need considerable repair in the way of stopping several leaks, cleaning out all piping and strainers, and in making certain by-pass connections around some of the valves to permit them to be operated with less danger of breaking off valve stems.

Provision should also be made where by water for about 90 per cent of the filter washing can be taken direct from one of the small settling basins, instead of using, as at present, water which has been filtered and pumped to the city against 140 pounds pressure.

By proper pipe connections to the new centrifugal pump to be installed, this can be done, thereby considerably reducing the cost of washing the filters

Fire Proection for Normal School.

The Normal school is now served with water through a 2½ inch pipe line 1,800 feet long, which does not provide adequate pressure on the upper floors for the ordinary uses of water, at some periods during the day, and through which it is impossible to furnish any fire protection.

A 6 inch main should be laid direct to the Normal, through which plenty of water can be furnished both for the ordinary use at the Normal, as well as fire protection.

Estimated Cost.

The estimated cost of all the improvements which have been suggested in the report, including liberal allowances for Engineering, Supervision and Contingencies is $46,000.00.

Bond Issue.

I recommend that you issue bonds in the sum of $50,000.00 to defray the expense of making all the foregoing improvements.

Respectfully submitted,
E. E. HARPER.

CHAS. WILES ENJOYING HIMSELF IN FRANCE

Maryville Soldier Writes of Wonderful Visit to Nice, Famous French Watering Place.

Mrs. Carl Wiles has received the following interesting letter from her brother, Chas. Wiles:

Nice, May 4, 1919.

Dear Folks:

I arrived here yesterday at noon and am having a wonderful time. We rested yesterday afternoon and took in a show at the Y. M. C. A. Casino in the evening. This is a very beautiful building, built out into the sea. Nice is located on the Mediterranean sea and is a very beautiful city. It is one of the world's most famous watering places. We have the Mediterranean sea on one side and the Alps mountains on the other. The climate here is great. When we left Neufchateau is was cold and rainy. We had about an inch of snow on the ground. It sure seems funny to leave a climate like that and come into a land with flowers in bloom and oranges ripe on the trees. There are also beautiful palms here. I believe I could stay here a year and not want to go home. This part of the country really is Sunny France. The fellow that gave it this name never went any farther than this though. Well, this morning we took a trip up the Sea coast and visited Monaco and Menton, going over the Italian frontier a little ways. Coming back we came through the mountains which was a wonderful trip. The first stop was at Monaco, the little principality where the world renowned gambling Casino of Monte Carlo is located. We went through this Casino and saw the gambling tables. This is about the most wonderful building I was ever in. The people in Monaco do not pay any taxes, the revenue from this Casino keeps up the city. We also visited the Oceanographic Institute where we saw about a million different kinds of fish and other collections from the far north. From here we went to Menton and crossed the Italian frontier. I sent you several post cards with Italian stamps on them. The trip coming back through the mountains was very interesting. One place we saw an old monument erected by the Romans, which was built about 19 years B. C. We also saw many old castles which were interesting. I sure wish you were with me on this trip, I can't begin to describe the places to you. This leave will be worth thousands of dollars to me. The hotel we drew is not extraordinary but it will do. Some of the fellows are living like kings and I am not far behind them. We have another trip scheduled for tomorrow. It is Cannes and vicinity. These trips only cost us twenty francs each. I believe they could charge a hundred francs each and have just as many go on them.

Well, I will try to write you again soon, so will close this time.

Your brother,
CHAS. WILES.

BOY'S TROUUBLE COST MOTHER TEOUSANDS

Suffered Since He Was Two Years Old —Gains 16 Pounds On Tanlac.

"My nephew, James Hogan, who is fifteen years of age has gained sixteen pounds on Tanlac and is now a robust, happy boy after thirteen years of awful uffering," said Miss Maggie Goldsmith, 280 Henry Ave., Memphis, Tenn. Miss Goldsmith has been connected with the Joe L. Ullathorne Seed Co., of that city for twenty-seven years and is a stockholder and director in the company.

"Ever since James was two years old," continued Miss Goldsmith, "he has been afflicted with stomach trouble. Two or three hours after eating, especially the evening meal, he would begin to complain of severe pains in his stomach which would increase until he would go into convulsions. These spells would come on five or six times a month and last about thirty minutes and he would be unconscious for an hour. Some said he had heart trouble and others said it was vertigo. His condition kept him down to almost a skeleton and it was pitiful to see how he suffered.

"His mother took him to St. Louis, and many other places for treatment, and we spent thousands of dollars trying to find some relief for him but it was all to no avail.

"But all that awful load of anxiety and worry has been lifted. James is now a well and happy boy and is going to school, and a few bottles of Tanlac did it. He always complained of having to take other medicines but he seemed to like Tanlac and since taking five bottles he is sixteen pounds heavier and doesn't look like the same boy. He wants to eat all the time and can eat anything without it hurting him. It makes us repoice to see James well and stout and enjoying life like other boys. We are not looking for notoriety but for the sake of suffering humanity, we are willing to give our unqualified endorsement for Tanlac."

Tanlac is sold in Maryville by the Koch Pharmacy and by A. M. Colly, Conception Junction; H. M. Lincoln, Pickering, and Carter Pharmacy, Burington Junction, Mo., and in Barnard, by Bear Drug Store, in Elmo by King Drug Co., and in Clearmont by Dr. W. H. Wiley; Ravenwood by C. A. Shunk. —Adv.

Graham M. E. Church Notes.

Services next Sunday will be at Graham at 11 a. m. and Centenary at 8:30 p. m.

Services at Mt. Zion will be discontinued until a bridge near there is mended so the people can get to church

Everybody is welcome to all services.

ROLLIE POE, Pastor.

WOMEN ARE CARELESS.

This has been proved over and over again during the war. They overestimate their physical strength and overtax it. Their ambition is commendable but does not compensate for the hours and days of misery which they suffer from symptoms caused by female ills brought on by overwork. Women who are weak, nervous, despondent with headaches, backache and dragging-down [illegible] remember there is one tried and true remedy that is Lydia E. Pinkham's Vegetable Compound, now recognized everywhere as the standard remedy for such ailments.—Adv.

BREWERIES READY TO RESUME OPERATION

Await Action of Congress on President's Message—Many Will Not Resume Manufacture of Beer.

St. Louis, May 21.—If congress acts promptly on the recommendation in President Wilson's message that the ban on beer and wine be lifted, brewing can be resumed at the Anheuser-Busch plant within twenty-four hours, according to August Busch, president of the brewing association. Many St. Louis breweries, however, are not in the same position, and it is doubtful if some of them will resume operation at all, in view of the fact that the dry amendment to the federal constitution goes into effect next January.

The recommendation in the Presidents' message refers to light wines and beer only. It is based on the president's belief that demobilization of the army has been carried to such an extent where the prohibition ban is no longer needed for war-time purposes. Congress previously had given the president authority to enforce the total prohibition ban in the event that demobilization was not completed. Under this order no brewing has been done at most St. Louis breweries since December 1, last. Some breweries, it is said, have gone ahead on the assumption that beer with less than 2¾ per cent of alcohol is not beer.

A torpid liver is a heavy handicap to a working man. It robs him of trength, energy and mental alertness To remove the burden the proper remedy is Prickly Ash Bitters. It is a fine liver, stomach and bowel medicine. Price $1.25 per bottle—Maryville Drug Co., Special Agents.—Adv.

Refreshing flavor and fragrance and unusual mellow-mildness make Camel Cigarettes instantly and permanently likable!

Camels are sold everywhere in scientifically sealed packages of 20 cigarettes; or ten packages (200 cigarettes) in a glassine-paper-covered carton. We strongly recommend this carton for the home or office supply or when you travel.

18 cents a package

CAMELS are a cigarette revelation! They are a smoke delight! They answer the cigarette question as it has never before been answered. Your taste will prove that!

Camels are an expert blend of choice Turkish and choice Domestic tobaccos which you will greatly prefer to either kind of tobacco smoked straight. Your test proves that!

This expert blend brings out Camels' wonderful cigarette qualities. It eliminates any unpleasant cigaretty aftertaste or any unpleasant cigaretty odor! It also makes possible Camels' enticing mildness while retaining the full "body" of the tobaccos.

No matter how much you like Camels and how liberally you smoke them, *they will not tire your taste!*

For your own satisfaction compare Camels with any cigarette in the world at any price!

BOARD OF EQUALIZATION TO ANNOUNCE ASSESSMENTS

Increase in Valuations of 20 to 25 Per Cent Over Last Year—Announcement Within Week.

Jefferson City, May 21.—There is but little doubt now that the State Board of Equalization will in a few days announce assessment of the real and personal property of the state.

There will be an increase over the valuations of last year of 20 to 25 per ent and the figures returned by the ate Tax Commission will be ignored as hey were last year.

The total fixed last year for real and personal property by the State Board was approximately $2,000,000. With the natural normal increase plus the 20 per cent to be put on by the board the total this year will be close to $2,500,000 as against the ull assessment figures of $4,000,000,000 reported by the Tax.

Following this will be assessment of he railroad, birdge, telegraph, telephone and other corporate property which will run the State up to approximately $3,000,000,000.

Announcement of the figures on the equalization of the real and personal property is expected some time during he present week.

By KATE SCHENCK

PHONES—OFFICE 42. HOME 685

Rebekah Lodge.

The Rebekah Lodge requests the members to be present tomorrow night at 8 o'clock in I. O. O. F. hall.

Entertains Class.

Mrs. J. B. Robinson entertained the members of her Sunday school class of the Christian church Monday night. A business meeting was held and the remainder of the time was spent socially.

Dinner Guests.

Mr. and Mrs. Roy Wolfers entertained with a six o'clock dinner Sunday night at their home in Pickering. Their guests were Mr. and Mrs. A. Neil Somerville, W. N. Deatheridge and Fred Wolfers of Maryville, Mrs. N. C. McKibban of Omaha and Miss Mary Wolfers.

Line Party.

A line party was given last night at the Empire, after which refreshments were served at Reuillard's. Those in the party were Gertrude Conn, Merle Miller, Mildred Nute, Lena Tunnel, Claudine Woollen, Sue Shisler, Gustina Dills, Opal Hankins, Fern Campbell and Ruby Ewing.

Birthday Dinner.

Mr. and Mrs. Lawrence Ogden entertained at a dinner party last evening to observe the birthday anniversary of Mr. Ogden's father, Eugene Ogden. Covers were laid for Mr. and Mrs. Eugene Ogden, Mr. and Mrs. Bruce Montgomery and daughter, Jean; Mr. and Mrs. J. F. Montgomery, Mr. Grant, Homer Ogden and the host and hostess.

Wesleyan Bible Class.

The Wesleyan Bible class of the First M. E. Church met last night at the home of Mrs. Harry Mutz. At the conclusion of a business session, the time was spent socially and refreshments were served by the hostess and her sister, Msis Ilene Kemp. The visitors for the evening were Miss Kemp and Mrs. Ernest Robinson of Springfield, Mo., who is the guest of Miss Ruth Matter.

Westminster Guild.

The last meeting of the year of the Westminster Guild was held last night at the home of Miss Leona Willard, with Miss Margaret Lee Winston as assisting hostess. The program included vocal solos by Mrs. C. Edwin Wells, Mrs. E. T. Rasmussen and Miss Helen Zenor, and a reading on "Home Missionary Workers," by Miss Mildred Evans. At the conclusion of the program refreshments were served by the hostesses. The visitors for the evening were Mrs. C. Edwin Wells, Mrs. Florence Staples, Mrs. E. T. Rasmussen of Riverton, Neb., who is visiting her parents, Mr. and Mrs. H. T. Crane; Mrs. Brown and Mrs. J. F. Cook. The Guild is planning a picnic in June at Normal park.

Mary Lawrence Circle.

Miss Grace Langan and Miss Gertrude Condon entertained the Mary Lawrence Circle of the Christian church last night at the home of Miss Langan on West Second street. Miss Addie Hunter, with "Women Working Together" as her subject, led the meeting. Miss Ida Bosch, Miss Marie Reuillard and Miss Thella Hogue read papers on the subject of the evening. A letter from Mrs. J. D. Frank of Livingston, Texas, a former member of the Circle, was read by Miss Condon. Miss Anna Bainum, Miss Marjorie Hartman, Miss Bosch and Miss Allen Willis were guests of the circle.

Sunday Dinner.

Mr. and Mrs. Clarence Bailey entertained at dinner Sunday at their country home in honor of Arthur Bosley, who has just returned from Creighton, S. D. Plates were laid for Mr. Bosley, Mr. and Mrs. Wm. Eib, Mr. and Mrs. Wm. Bosley, Mr. and Mrs. Frank Bailey, Mr and Mrs. Marion Lugar, Mr. and Mrs Homer Worl, Albert Bosley, Frauline, Irene, Dorothy and Harrell Bailey, Lavern and Doris Thelma Worl, Alfred and Marion Eugene Lugar, Mary Oakerson, Mildred, Floyd, Clara Opal, Orville and Clifford Bailey, and the host and hostess.

M. I. Circle.

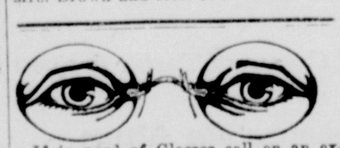
The M. I. Circle met with Mrs. J. D. Ford, at her home on North Buchanan street, yesterday afternoon. Devotions were led by Mrs. J. F. Cook, and Mrs. J. W. Ray was in charge of the program. The leader read a paper on "Pioneer Days in Nodaway County and Maryville," and referred to the first churches and the rural schools in the county as they were in those days. She also read some poetry composed by Mrs. Will Price. A poem entitled, "The Fightin' Funston Gang," was read by Mrs. Ford. A prophecy of the Circle, given by Mrs. Cook, concluded the program. Mrs. Warren Jones and Mrs. Bratcher were visitors for the afternoon.

Children's Party.

Mariam and Halbert Catterson entertained a number of their little friends yesterday afternoon at the home of their parents, Mr. and Mrs. Hal Catterson, 1510 North Main street. The afternoon was spent in games, after which refreshments were served by Mrs. Catterson, assisted by Mrs. John Wilson and Mrs. Wm. Mountjoy. The guests were Mary Coe, Katherine McMillan Laura Margaret Raines. Margaret Louise Hosmer, Lora Mae Crossan, Eva Margaret Frank, Esther Roseberry Katherine Rathbun, Edwyna Forsyth Virginia Belle Dean, Genevieve and Mary Todd, Mary Gex, Olive Ewing Mary Elizabeth Jones, Lucile Gaugh Elizabeth Beech, Mary Donna and Graham Malotte, Robert and John Edward Mountjoy, John Frazee and Curtis Coe.

Charivari Newlyweds.

A party of friends charivaried Mr. and Mrs. Virgil Hartness at their home last night. Mr. Hartness and his bride returned Saturday night from a short honeymoon trip and are at home at 303 Park Avenue.



If in need of Glasses call on an exclusive Doctor of Optics, who is competent. JOHN LE GRAND BAKER is Maryville's exclusive efficient Doctor of Optics. 2 blocks west of Postoffice.

SUGGEST $65,000 BOND ISSUE

(Continued from page 1)

Mr. Ford stated that a short time before the city took over the water plant, the owners of the plant had figured on spending $75,000 for improvements and new machinery at the plant if they could get the rate necessary. He pointed out that the city had only $50,000 to do this work from their bond issue and that the plant was even in worse condition when taken over by the city than the owners thought.

R. L. McDougal, another member of the former Board of Public Works, expressed practically the same sentiments on the question and spoke in favor of the $65,000 issue. "The plan suggested by Mr. Harper is obviously the correct one," he said, "and no time is better than the present for definite action."

The plan was indorsed by several other prominent men of the city, among them Mayor Garrett and G. B. Roseberry, members of the present Board of Commissioners. G. L. Wilfley chairman of the meeting, called at random for the sentiment of the various citizens, and without exception favor was expressed for the issuance of the bonds

Preceding the discussion of the bond issue last night a report was read by E. E. Harper, the Kansas City Engineer who has been selected by the city to plan and devise the proper ways and means of improving the water system.

Mr. Harper gave a summary of the plan, omitting all technical language, and illustrating the various points on a blue print diagram. The principal features which he brought out were the increased storage of the plant, better fire protection, and of "paramount importance" as Mr. Harper said, the increased purity of the water. The engineer explained that the latter phase was one of the most important from the standpoint of the public health, and that it was his aim to furnish the purest water possible to Maryville.

In the course of his talk, Mr. Harper gave a demonstration of the effect of the chemicals which are put into the water by the present system, and then showed how he would remedy the fault Taking two jars of muddy water which he had secured from the river, he placed a quantity of alum and lime in each. In one he stirred the contents, while the other was left quiet. Within a very short time the water which had been stirred, began to clear up and the mud and sediment settled to the bottom while in the other the foreign substances remained in suspension. By this experiment, Mr. Harper showed the necessity of thoroughly mixing the coagulants with the water—a thing which is not efficiently done at the present time and for which provisions have been made in the new plant.

After the report had been given, questions were asked on various phases of the problem by the citizens, which were explained by the engineer.

Before going to the church last night, about 40 citizens visited the water plant and river, and inspected the present system. Mr. Harper personally explained where the various changes were to be made and the manner in which he proposed to make the improvements.

The dinner last night was put on under the auspices of the Commercial Club and was served in the ante room of the Christian church, by the women of the church. An excellent emal was prepared by the women and the keen interest which is being felt in the big water problem was indicated by the large number who remained to hear the discussion following the dinner.

The commissioners will meet within the next few days to set aside an election day for the purpose of voting on the proposition. It is necessary to have a two-thirds majority to carry.

You Can't Cure Rheumatism With Liniments and Lotions

Torturing Pains Promptly Return in All Their Intensity

You may as well throw your liniments to the winds, if you expect them to rid you of the pangs of rheumatism. In fact, the sooner you discard forever the use of all forms of local treatment, the sooner you will get on the right track which leads to rational means of relief.

For you can rub and rub from now until doomsday, and you will never make any progress toward ridding yourself of rheumatism, because such treatment does not approach the source of the disease.

Remember from the outset that the pangs of rheumatism come from a deepseated cause, and that simply rubbing the painful parts of the body has no effect on the disease itself. But when you locate the cause of the disease, the real source of all these intense pains, you can then treat the disease intelligently.

And until you do treat your rheumatism intelligently, you will never be free from its disabling pains.

So many people have found real, genuine and lasting relief from rheumatism by purifying the blood with S. S. S. that we are justified in recommending this splendid remedy to all who are afflicted. Perhaps your case is like thousands of others which are caused by millions of tiny disease germs in the blood. S. S. S. so thoroughly cleanses the blood, that it routs out completely and eliminates all disease germs that infest it.

In this way the source of the disease is reached, and its cause removed. Give your system a thorough cleansing with this reliable vegetable blood remedy, and you will be delighted to be free of the pangs of rheumatism. It has been used for more than fifty years and is sold at all drug stores. Begin its use today and you will have the same satisfactory experience as thousands of other sufferers.

Should you wish special advice about your own case, it can be had without cost by writing to Chief Medical Adviser, 101 Swift Laboratory, Atlanta, Ga.

LEONARD EAR OIL

Relieves Deafness, Stops Head Noises

Nine out of ten cases of Deafness and Head Noises are caused by catarrhal mucous (matter) in the Eustachian Tube, which connects the nose and the ears. Leonard Ear Oil removes the mucous, opens up the tube and the other air passages of the head, and the result is improved Hearing and relief from Head Noises. It is not put in the ears, but is "Rubbed in Back of the Ears" and inserted in the nostrils, and "Common Sense Directions for Care of Hearing," which accompanies each bottle, tell you exactly how to take care of your own case. Do not be misled by substitutes or imitations. The only genuine "EAR OIL" is A. O. Leonard Ear Oil. It is the original and has been on the market since 1907, and every year it has relieved hundreds of people of their Ear Troubles. No matter how long you have been deaf, nor how deaf you are or what caused your deafness, or how many things you have already tried which have failed to relieve you, Leonard Ear Oil has relieved many such cases as your own. Why not you?

LEONARD EAR OIL AGENCY

A Testimonial That Has Been SWORN TO

11-13-18.

Dear Mr. Leonard—Having had my hearing completely restored by Leonard Ear Oil, I feel it an obligation to let you and others know what it has done for me. My deafness was caused by catarrh and I had been growing worse for years. I had become so deaf I was considering giving up my regular business because of my deafness. It was necessary for me to hear well in my regular work. After using less than two bottles of Leonard Ear Oil I hear as well as ever and am still on my job. Sincerely yours, JOSEPH A. STAFFORD, 531 West 145th St., New York City.

Subscribed and sworn to before me this 13th day of November, 1918. Joseph Braman, Notary Public No. 221, City and County of New York.

CONDEMN THE SUNDAY PAPER

Presbyterians Not Altered by Charge of Insincerity by Member.

St. Louis, May 20.—Resolutions approving the proposed League of Nations and emphatically condemning the publication of Sunday newspapers were adopted at Monday's session of the one hundred and thirty-first general assembly of the Presbyterian church of the United States. Spirited discussion preceded the adoption of the Sunday newspaper resolution, which calls on members of the church not to 'subscribe for, read, or advertise in it."

The Rev. Dr. John A. MacCollum of Philadelphia, in a speech condemning the resolution, charged the commissioners with insincerity.

"Let us be sensible about this question," he declared. "What the church needs more than anything else is sincerity. I did a little detective work around the hotels yesterday and saw two former moderators, many of the secretaries of boards and about half the commissioners here reading Sunday papers; many had them at the breakfast table. The Sunday paper is just as necessary as the Sunday trolley which you attempted to condemn several years ago."

All games, sports, unnecessary traveling, commercialized and uncommercialized entertainment on Sunday were denounced in other resolutions.

Everybody go to the big tent theatre tonight and see the new "Thorns and Orange Blossoms."

SPRING FEVER

Following Colds, Grippe, Thin, Watery or Poisoned Blood

(By Dr. Valentine Mott.)

At this time of year most people suffer from what we term "spring fever" because of a stagnant condition of the blood, because of the toxic poisons stored up within the body during the long winter. We eat too much meat, with little or no green vegetables.

Bloodless people, thin, anemic people, those with pale cheeks and lips, who have a poor appetite and feel that tired, worn or feverish condition in the springtime of the year, should try the refreshing tonic powers of a good alterative and blood purifier. Such a tonic as druggists have sold for fifty years, is Doctor Pierce's Golden Medical Discovery. It is a standard remedy that can be obtained in tablet or liquid form. Made without alcohol from wild roots and barks.

Occasionally one should "clean house" with castor oil or tiny pills made up of the May-apple, leaves of aloe and jalap, and sold by almost all druggists in this country as Doctor Pierce's Pleasant Pellets.

Boulder, Colo.—"About seventeen years ago I was given up by home physicians. I was discouraged, but hearing of Dr. Pierce's wonderful Golden Medical Discovery thought I would give it a trial. I coughed night and day, but after taking the third bottle of the 'Discovery' the cough began to cease and I lay down for the first night's sleep in six weeks. I then wrote to Dr. Pierce and took specially prepared medicines for about three months. I also kept taking the 'Golden Medical Discovery' during this time and continued for one year. I can safely recommend Dr. Pierce's Golden Medical Discovery to all."—Mrs. O. J. Adams.

Velvet
THE FRIENDLY TOBACCO
THERE may be some things that can be done well in a hurry, but pickin' a wife an' agein' a tobacco ain't amongst 'em.
Velvet Joe
We put away millions of pounds of fine Kentucky Burley tobacco every year, stored in wooden hogsheads. It ripens two years. When we take it out it's different—Nature has improved it, good as it was—made it friendlier, more fragrant, cool-smoking, long-burning.
Nature has given it a delicious quality of mildness and fragrance that no artificial means can ever equal.
It's just that extra touch of friendly goodness that is building up VELVET Tobacco into the favor and good will of thousands of pipe smokers who prefer to smoke tobacco cured in Nature's way.
You would notice the difference.

VELVET'S nature-aged mildness and smoothness make it just right for cigarettes.

ADDITIONAL ALLOWANCE FOR TRAVEL IS GRANTED.

Washington, D. C.—Having practically completed the $60 bonus payments to discharged soldiers from the army, so far as demobilization has progressed to date, the War Department's Director of Finance is now settling additional travel allowances due enlisted men under the act of Congress approved February 28, 1919. Under this act, settlement is to be made on the basis of five cents a mile to actual bona fide home, residence or place of muster into the service, at the option of the soldier.

Under this act, the soldier receives an additional allowance of one and a half cents per mile, and all soldiers who were mustered out before payment of this allowance was begun are entitled to the additional amount, upon filing claim with the auditor of the War Department.

A blank form of application, which includes the necessary affidavit for the additional travel allowance, may be obtained from any army recruiting officer, the Red Cross or other agency organized to aid soldiers. This affidavit must be accompanied by a true copy of the soldier's discharge certificate, which will be returned with the check.

While payment will be made on the original discharge certificate, claimants ade advised that the use of a copy will eliminate the possibility of the loss of the original. A certified copy of discharge certificate submitted for payment of the $60 discharge bonus and now on file in the Zone Finance Office will be accepted in lieu of other copies or original certificate. Men who have submitted these certified copies should so state when forwarding claim.

In the payment of the $60 bonus granted by the Government to discharged men, the Director of Finance has paid out more than $800,000,000, as the number of discharges up to this time have approximated 1,400,000.

J. F. Montgomery returned this morning from a visit in Chicago.

VON ETZEL "ON THE RUN."

New York, May 21.—In the Summer of 1917 General Pershing went to the Verdun front to witness the smart French attack that swept the Germans back from Dead Man's Hill and firmly re-established French positions northwest of the fortress city.

Arriving there he found that by good fortune the French officer commanding the operation, and his host, was Colonel Corvissart. Corvissart was French military attache with General Kuroki's army in the Russo-Japanese war; Pershing was American attache, and the two were great friends. They went to the front and from an observation post watched the progress of the attack and finally saw the Germans late in the afternoon begin falling back before the advance of the poilus.

"By the way," said General Pershing as they started back to corps headquarters. "I onwder whatever became of old Von Etzel, the German military attache with Kuroki. Remember him? We all disliked him so."

"Von Etzel?" laughed Colonel Corvissart, "why, that's Von Etzel's army my poilus are driving back over that hill."

Dr. Lorace Catterson of Duluth, Minn., arrived yesterday to spend several weeks with his mother, Mrs. Omer Catterson.

About Homer Croy.

The following paragraph is from a letter from Lee Shippy in Paris to the Columbia Evening Missourian:

"The first Missourian of interest to Missouri University and the typewriter tapping profession I met over here was Homer Croy. Before he degenerated into a novelist Homer worked on The Post-Dispatch, just after leaving the university, but he wasn't quite bright enough for the newspaper business, so he fell first to magazine work with Leslies and then to writing books. Over here he has been one of the bosses of the cinema department of the Y. M. C. A. which just now is giving more than 4,000 showings a week for the A. E. F. He is about to return to America, as there isn't a bed in France quite long enough for him, and after eight months of sleeping curved up, he feels an overwhelming desire to go home and straigh ten out. It was not so bad in winter, but now that the warm weather is here he can no longer stand doubling in brass beds."

F. M. Townsend left this morning for Denver, Colo., to join his wife, who is visiting her parents, Mr. and Mrs. Henry Bohm.

The Caroline Islands number more than five hundred. In 1911 the total population was about 55,000, and of these fewer than 400 were Europeans.

DETECTIVE ON PROGRAM

Harry J. Loose of Chicago, on Chautauqua Platform, Here This Summer.

Harry J. Loose, the Chicago detective, who is to appear on our Chautauqua program this summer, is city born and city bred. All of his work has been done in and about Chicago. He cheerfully admits his ignorance regarding conditions in other sections than the Chicago district.

When the Redpath-Vawter folks notified him that part of the summer would be spent in Minnesota and South Dakota he wrote to the office regarding what clothing he should wear.

"I am a city worm entirely," he wrote, "and know little about the country as a whole. All I know of the Dakotas is what I read as a boy in "Deadwood Dick's Last Hope or the Redskin's Revenge." This volume did not mention anything about the weather as I recall. The deepest impressions I received from it was that that part of the world was safer for bald-headed men. I am such a new bird in the chautauqua aviary and have so much to learn that I would be grateful for any information that would be of service.

Mr. Loose declares that his twenty years connection with the Chicago police force has convinced him that "they never get away." This is the dominant thought of his address and one which should cause every lad contemplating life of crime to reflect upon—"They never get away."

FOR UNITY OF ACTION.

Divided leadership hindered and perhaps prevented allied success in the great war for nearly four years. Time after time great opportunities were lost through lack of co-ordination between the different allied armies. There was no unity of command because the allied nations were not willing to make the sacrifice of individuality which the appointment of a generalissimo required. Then came the great German drive in Picardy last March; after that the question of a single command ceased to be a matter for discussion and became a matter of life and death necessity. It was not until the allied cause had been pushed to the edge of the precipice that Foch was given the supreme command. Today we all know what that appointment meant to the future of mankind.

Missouri has suffered to some extent from divided command and lack of coordination. The time has come when this condition must be ended.

The Federation of Missouri Commercial Clubs, enjoying, as it does, the confidence of rural Missouri, working quietly and effectively through local units might well be the ideal organization through which to work for greater state development. Civic soldiers recruited from its ranks put Missouri "over the top" in every campaign connected with the winning of the war. The state university, the normal schools, the school of mines, the college of agriculture and the state highway board, realizing the power and influence of the federation throughout the state, have always worked with that organization, largely because of its ability to get things done without monopolizing the spotlight. The war is over in fact, if not in law, and it is up to all Missourians to give "Whereas" a rest and get busy.

A struggle for growth and development among the various states is sure to begin with the coming of peace. Missouri must unite forces and prepare to tackle the future as a unit. A central organization such as the Federation of Missouri Commercial Clubs, supported by the educational, agricultural, industrial, business and professional forces of Missouri, can be of tremendous service to the state in the strenuous years of after-the-war readjustment. Missouri, already a great state, despite the knocking of its disloyal newspapers, can become a greater state thru the better co-ordination of its varied activities.—St. Louis Times.

VOLUME 9. MARYVILLE, MISSOURI WEDNESDAY, MAY 21, 1919 NO. 298

SUGGEST $65,000 WATER BOND ISSUE

MOTION BROUGHT BY M. E. FORD FOR IMPROVEMENT OF SYSTEM

HARPER OUTLINES PLAN

Plan Endorsed by Nearly 100 Citizens at Rousing Meeting Last Night.

Principal Features.

Following are the features of the new water plant improvements and the report which was read by Mr. Harper:

Storage at plant increased from 8 to 40 million gallons.

New concrete coagulating plant to be constructed to properly prepare the water for filtration.

Basins 1 and 2 to be lined with concrete.

New intake to be built on river bank.

Motor driven pumps to be installed at river, but steam plant kept in repair for emergency use.

Concrete reservoir to be built in town, capacity 300,000 gallons and special motor driven fire pump, capacity 1,000 gallons per minute at 100 pounds.

pressure to be installed at this reservoir to provide direct pressure for fires

Repairs to dam.

Fire protection to Normal.

Filter repairs.

The first step toward the realization of an efficient water plant for Maryville, fully adequate to supply the three essential demands of quantity, quality and sufficient fire protection, was taken at the meeting last night at the Christian church at which nearly a hundred citizens gathered to thresh out the problem and hear the plan suggested by E. E. Harper, the consulting engineer from Kansas City. Near the close of the meeting, a motion was brought by M. E. Ford, a member of the former Board of Public Works, for a $65,000 bond issue to carry the project. By a standing vote the citizens showed that they were unanimously in favor of the move.

In presenting the motion, Mr. Ford spoke of the water problem which came before the Board of Public Works six years ago when the present plant was taken over from private ownership by the city at a cost of $50,000. A $100,000 bond issue was voted at that time to cope with the water situation, which, after the plant had been purchased, left $50,000 for the improvement of the system. Mr. Ford stated that the amount was insufficient to carry the work on properly and that the Board of Public Works was able to make only a limited number of the improvements which were necessary. "The big trouble which has always come up in connection with this problem," said Mr. Ford, "has been the lack of money to do things with. I have been interested in the water question for many years, and numerous plans have been presented for the improvement of the plant, but without the necessary cash, the men in charge have been unable to make the changes. The suggestion that $50,000.00 be raised through the issuance of bonds would probably be sufficient to make the absolutely necessary improvements but there are other improvements which should also be made at this time, such as the extension of the system and repairs to the city mains. I am certain that at least $65,000 would be necessary. If there is a little left over it can be used for emergency purposes." Mr. Ford showed that continual makeshift changes and repairs in the system were insufficient and expensive to the city, and that the only logical way to deal with the problem would be to rebuild the plant upon efficient lines once and for all.

Engineer Harper's Report

State Historical Society COLUMBIA

The Honorable Ma... Council,
Maryville Missouri.
Gentlemen:

I submit the following ...with preliminary plans and estim... ing to the construction of i... ments to your water works syste...

In this report I desire to call your attention briefly to certain important features in connection with your water supply, water purification, method of pumping and fire protection facilities, all of which have been considered in preparing the plans and estimates submitted herewith.

Water Supply.

In considering the question of a water supply, I think it should be approached with the idea in view that it is a poor policy to make any extensive expenditures either on a source of supply or a location that can not be considered as permanent.

I am thoroughly satisfied that you are using the proper source of supply, and in view of improvements and expenditures already made, I think it will be desirable to continue with the present location of the plant for the future.

At the present time you have very little storage, (only about 8 million gallons) outside of the river, and this is not sufficient to carry over long periods of excessive drotuh, such as occur perhaps every 8 or 10 years.

Therefore I recommend that you increase the storage capacity by cleaning and enlarging the present No. 3 reservoir so that it will hold 18,000,000 gallons, and that you construct, on land owned by the city just north of the present reservoir, another reservoir with a capacity of 21,000,000 gallons.

The accompanying plans show in detail how it is proposed to do this work, and these two reservoirs will give you, in connection with the two small basins, a storage of 40 million gallons of water, or five times the present storage.

The present consumption of water is about 350,000 gallons per day, and making liberal allowances for evaporation and seepage this 40 million gallon storage will last the city, at the present rate of consumption, about 90 days, with no water pumped from the river at all.

However we can always count on PART of the necessary supply, at least enough to care for the evaporation and seepage from the reservoirs, from the river, even in the dryest of weather, so as a matter of fact, the proposed storage will be sufficient to care for the city's requirements for even more than 3 months, at the present rate of consumption.

Moreover this large storage will permit the heavy sediment to settle out of the water, and will make it unnecessary to prepare muddy water for filtration, as is the case at the present time.

As a matter of fact, it should never be necessary to pump any real muddy water into these storage basins, for they are so large that the proper thing to do is to use the water from these reservoirs when the river is muddy, and do no pumping from the river to the reservoirs till the river water is fairly clear.

With this plan of operation, there should be no filling up of the reservoirs with sediment from the river as has been the case with the present small reservoir.

Intake Well.

To insure that the obtaining of the water supply from the river shall not be interrupted, it is advisable to construct a small intake well on the river bank, so arranged that the suction lines leading to the pumps can always be readily inspected, and repairs made on foot valves, screens, etc., at any time. Plans for this intake well have already been submitted to you.

Coagulating Plant.

Before any water can be successfully and economically filtered, it must be prepared for filtration by the addition of the proper coagulants, which must be thoroughly mixed with the water for a period of from 10 to 30 minutes, after which the water is allowed to settle for several hours before going to the filters.

This is one thing that is very badly needed, for at the present time the facilities for doing this work are only of a temporary nature, and are quite inadequate. This is one of the improvements contemplated herein.

New Pumping Equipment.

The present low service pumps which are of the centrifugal type, driven by small steam engines, and used for pumping from the river to the basins, must soon be replaced, as the engines are badly worn, and the pumps are pretty well worn, too.

I recommend that you remove one of these pumps, and replace it with a motor driven centrifugal pump, to be used to pump from the river to the basins, this pump to have a capacity of about 600 gallons per minute. Repair the other engine driven unit, and hold it in reserve for emergency use.

To pump to the city I believe you will find it advisable and economical to install a motor driven centrifugal pump, to pump at the rate of about 400 gallons per minute through the filters to the city.

The installation of these two pumps will permit you to do all the pumping electrically, and this will permit you to dispense with one engineer at the plant, and do all the work with one man.

However, I do not advise that you dispense with the steam equipment but that you hold it in reserve, keeping it in working order by using it a few hours a week, so that in case of accident to the motor driven pumps or the transmission lines, the steam pumps can be operated as at present.

It will not be feasible to furnish increased pressure, in case of fire, with the motor driven pumps to be installed at the plant, but this feature is taken care of in another way, as will appear later on in this report.

Fire Protection.

At the present time the fire protection is furnished either by direct pressure from the plant, or from the pressure of the 150,000 gallon tank, located on a tower in the city, at such a height that when full the pressure in the business district is about 50 pounds.

There is an eight inch pipe line now leading from the pumping plant at the river to the city, and the length thereof to where this pipe branches and connects to the mains in the city is about 7,000 feet.

When pumping at the ordinary rate, the pressure at the plant is now about 140 pounds per square inch, or about the safe working strength of this pipe line, and this is when pumping at the rate of about 500 gallons per minute.

Now 500 gallons per minute is not enough water to furnish fire protection, when pumping direct, but if even this small quantity is supplied at a pressure of 100 pounds in the city, it will require about 190 pounds pressure at the plant, which is not safe, but likely to burst the 8 inch main at any time.

Moreover the quantity of 500 gallons per minute is too small and if this be increased to 700 gallons per minute, which is the maximum carrying capacity of the 8 inch main, the pressure at the plant would have to be increased to about 230 pounds at the plant, which is more dangerous than ever.

In other words, it is entirely out of the question to furnish adequate pressure for fire protection, even when the standpipe is full, to say nothing about when it is only half full or less.

There are two methods by which better fire protection may be obtained, as follows:

1st. Keep the present steam plant in operation, with fires banked at night and depend on direct pressure from the river, in which case it will be necessary to lay an additional pipe line from the river to town, not less than eight inches in diameter, but preferably ten inches in diameter, of extra heavy pipe. An 8 inch line 7,000 feet long will cost $16,000 and a 10 inch pipe, $21,000.

2nd. Install a storage reservoir in the city with a supply of say 300,000 gallons of water, with a special motor driven fire pump against 100 pound pressure, to be used to furnish direct pressure for fires.

Reservoir and Fire Pump in City.

The last method above mentioned appears to me to be the most desirable for several reasons.

In the first place, it provides the storage of water for fire protection, IN THE CITY, not two miles away.

Secondly, it does away with exceedingly high and dangerous pressures in the pipe line from the city to the river.

Third, the cost is less than any other scheme.

It has been suggested that another large elevated tank might be built in the city, but the cost of such a tank if installed at a height to give good fire pressure, would be prohibitive, and such a structure is in itself always exposed to some hazards such as storms.

The city now owns a large tract of ground in the rear of the present fire department building, and this provides

(Continued on page 2)

PLAN SALVATION ARMY DRIVE HERE

LEADERS OF CAMPAIGN FOR N. W. MISSOURI VISIT HERE YESTERDAY

ELKS SPONSOR CAMPAIGN

Drive to Be Made June 9-16—$3,000 Quota for Nodaway—Langford Talks at Meeting.

Dr. Charles F. Roach, of Kansas City, and W. H. Langford, of Joplin, were in Maryville yesterday making preliminary arrangements for the Salvation Army drive for funds which is to be conducted June 9-16 throughout the United States. The two men are not connected with the organization but are working for the drive under the direction of B. E. Corliss, campaign director for Western Missouri.

The district of western Missouri has been assigned a quota of $51,000 and the quota for Nodaway county has been placed at $3,000. The city of St. Joseph will attempt to raise $65,000 and plans are being made for the erection of a Salvation Army building at that place.

The Elks Lodge throughout the country is sponsoring the Salvation Army drive and arrangements were made last night whereby the local lodge of the Elks are to have charge of the work here.

Both Dr. Roach and Mr. Langford attended the dinner and meeting held last night for the purpose of discussing the water question, and a five minute talk was made by Langford, in which he pointed out the object of the drive and the work which the Salvation army is attempting to do. Langford has a son who was in the aviation service overseas, and is in a position to know some of the great good done by the organization for the soldiers. "The Salvation Army has discontinued the Tambourine method of solociting," he said and are resorting to the budget system of raising their funds. Every soldier who has been in the trenches will vouch for the good work performed by the Salvation Army men and women. The cause is a worthy one and is deserving of hearty support."

"THE EYES OF THE WORLD"

At Empire Offers Something Different in Pictorial Drama From the Run of Great Film Offerings.

Departing from the merely spectacular and concentrating its essence into a powerful love story, gorgeous California secnic settings and elaborate musical attributes, "The Eyes of the World," at the Empire tomorrow and Friday nights, offers something different in pictorial drama from the run of great film offerings put forward of late. Represented in this achievement are Harold Bell Wright, author of the famous story, which has had a sale of over two million copies in book form, and W. H. Clune, who was associated in the production of "The Clansman" ("Birth of a Nation") and other large film ventures.

The noted author amplified the story for this production and personally assisted in the work of putting his characters on the screen. While "The Eyes of the World" is primarily a romance, it is melodramatic in the best sense, bristling with adventure, hazard and dramatice clash, as well as idyllic charm. The cinema version is in nine acts, was seven months in making at unlimited cost on the actual scenes of the story in Southeastern California.

The qualities that gave the book such phenomenal sale are intensified in the pictorial version, which has a wealth of gorgeous photographic settings. The presentation is a lavish one in every way. In numerous cities it has broken all theater records.

Former Resident Dead.

Mrs. Will Hughes has received word of the death of her father, C. O. Turner, 78 years old, which occurred Saturday morning at Sacramento, Calif. Mr. Turner lived for thirty-seven years on a farm southwest of Maryville, and three years ago went to California for his health. Surviving him are five daughters, Mrs. Hughes of Maryville; Mrs. Wm. Hardesty, living south of Maryville; Mrs. Maud Rochelle, Mrs. Mabel Walsh and Mrs. Mame Osborne, all of Sacramento; and two sons, Ed and will Turner of Hebron, Neb.

BEER AND WINE PLAN PENDING

PRESIDENT'S PROPOSAL BIG TOPIC AT CAPITAL TODAY

DIFFERENCE OF OPINION

Republican Leaders of Senate and House to Hold Conferences to Decide Action on Matter.

Washington, May 21.—President Wilson's proposal that congress repeal that part of war-time prohibition law affecting wines and beers is the all absorbing topic at the capital today. Until the Republican leaders of the senate and house had had time to thresh out the subject, it is stated they would not be prepared to determine whether or not to follow the president's suggestion that the war-time ban on the manufacture and sale of wines and beers be removed.

It is planned to hold a series of conferences before the week-end and it is hoped to be able to map out course for the Republican majority to pursue in both houses.

It was said a wide-spread difference of opinion persisted among the Republican and Democratic senators and representatives as to the changes of congress lifting the embargo.

Washington, May 21.—Full information of the Senate on all affairs was promised by President Wilson today. The President sent a cable to Acting Secretary of State Polk through Secretary Tumulty, acknowledging the receipt of the Senate's notification that it had convened. He hopes to be soon in Washington to communicate to them the full information on international affairs.

DISCOVERED—IDENTITY OF MYSTERIOUS AIRMEN

Army Men Make Fast Flight From Belleville, Ill., to York, Neb.—Maryville on Route.

The identity of the mysterious aviator who flew over Maryville about 12:30 Sunday afternoon in an army plane has been discovered—he was Lieut. G. H. McKay, U. S. A., and was accompanied by Sergt. C. M. Bentley, another army man. Following is an account of the trip and destination:

York, Neb., May 19. Lieut. G. H. McKay and Sergt. C. M. Bentsen, army aviators, assigned by the war department to make exhibition flights at the Nebraska G. A. R. encampment, which opens here tomorrow, made a fast flight from Belleville, Ill., to this place, covering the distance of 550 miles in five hours and forty-five minutes actual flying time. Leaving Belleville at 6:15 this morning they stopped at Chillicothe, Mo., for oil and lunch, that being their only stop until they reached York at 3 p. m. They maintained an altitude of about 3,000 feet.

FORMER BOSTON GIRL DIES IN PARIS.

Paris, May 21.—Lady Paget, formerly Mary Stevens of Boston, died at the Hotel Ritz last night following an attack of pneumonia, preceded by influenza.

Hopkins Woman Dies.

Funeral services for Mrs. Thompson, who died at her home, five miles north of Hopkins, were held yesterday afternoon at the Baptist church, and were conducted by Rev. R. R. Watts. Mrs. Thompson was 53 years old, and is survived by five children. A brother, John Hubbell and wife of Barnard, atatended the funeral.

El Reno Teachers Return.

Miss Esther Dietz and Miss Janette Mutz returned Monday night from El Reno, Okla., where they have been teaching the past year. Miss Mary Lewis and Misses Hazel and Mary Wallace, who also taught in the El Reno schools, will return to Maryville the latter part of the week.

Prayer Meeting Topic.

Rev. W. C. Ferguson, pastor of the First Baptist church, will have for his prayer meeting topic tonight, "If Ye Abide in Me," John 15:7. The meeting will begin at 8 o'clock.

To Teach Blackman School.

Miss Maud Whitehead, who has been teaching the Bell Grove school, has been hired to teach the Blackman school the coming year at a salary of $90 a month.

NC-4 IS HELD UP AT PONTA DEL GADA TODAY

Engine Trouble Makes It Improbable That Plane Will 'Hop Off" For Portugal Coast.

Washington, May 21.—NC-4 was unable to hop off from Ponta Delgada for the coast of Portugal today. The navy department received a message from Admiral Jackson this morning stating one of the engines of the plane is not functioning properly.

BOLSHEVIK ARMY IN BIG BATTLE

Major Part of Red Forces Sent Against Admiral Kolchak—Make Counter Offensive.

Paris, May 21.—Bolsheviks are concentrating a major part of their military forces against Admiral Kolchak and a great battle is in progress, east of Kolga, according to wireless sent out by the Bolshevik foreign office. Bolshevik admit retirement on Archangel-Nurman-Sk Daras fronts in wireless but add counter offensive is now going on with favorable results.

DEFINITE ACTION BY GOV. ON SCHOOL APPROPRIATION

Gardner Will Either Hold Up or Veto Outright 20 Per Cent of Appropriation—Totals $500,000.

Jefferson City, May 21.—Unofficially it is learned that Governor Gardner wil either hold up or veto outright 20 per cent of the appropriations made by the legislature for the State University, School of Mines, Lincoln Institute and the five State Normal Schools.

The educational bill as it passed the general assembly totalled approximately $3,000,000, so the "trimmings" from the various institutions covered by the bill will total nearly $500,000.

Announcement of the cuts will not be forthcoming for at least two weeks yet.

"WET OR DRY, WILL SELL BY FIRST OF JULY," SIGN READS.

"Wet or Dry, will sell by the first of July," begins a legend on a Sixth street sign in St. Joseph, hanging beneath a beer sign, and advertising to the passer-by for sale liquors that in the light of the Great Thirst to come, should be spoken of very respectfully, as soon to become very rare.

For the cafe, Hilgert's which for ten years has been a landmark on Sixth street below Edmond, a gathering place for livestock and commission men, where over the foaming brew men expanded and became jovial, and many a good story—and heads of cattle—oft changed hands, is for sale.

"What can we do," Michael Hilgert, the proprietor, himself a familiar figure in front of his cafe, alweays wearing a black skull cap, said in a tone of resignation last night. Then he brightened up. "I don't think the country will go dry. The people won't stand for it. If I were younger, I'd go back to the old country, Belgium."

Hilgert came to St. Joseph in 1888 from Maryville, and opened a cafe on Felix street in the store now occupied by Bell, the caterer. He moved into his present location ten years ago.

"Got anything on your hip" will soon be a very bold request, according to Hilgert, who looks forward to an extraordinary rise in the price of whisky. "There is no more whisky on the market, and the supply in stock is going to bring very high prices," he said.—St. Joseph Gazette.

Paul Chilton of St. Joseph, is visiting in Maryville with Mr. and Mrs. J. B. Robinson. He has been recently been discharged from the army, having served two years. He was overseas and was in the Argonne battle and several others.

Carl Wray and W. B. Torrance of Guilford, were in Maryville today. They said the Guilford chautauque would be held this year August 1, 2 and 3.

Mrs. J. M. Donahue and baby son of Superior, Wis., who have been visiting her mother, Mrs. Omer Catterson, have returned to their home.

GERMANS ASK TIME EXTENSION

CLAIM THEY HAVE NOT HAD TIME TO CONSIDER TERMS

48 HRS. LEFT TO DECIDE

Attempt to Create Feeling of Danger in Germany—"Feelers" Out for Allied Sentiment.

Paris, May 21.—The German delegation is understood to have presented an eleventh hour note demanding an extension of time, and adding that they can not sign the treaty now because they have not had sufficient time to consider it. This note is only one of a series which will be presented by the Germans for consideration by the allies within the next forty-eight hours, when the time limit expires. Tomorrow several meetings have been scheduled for Versailles.

The Germans are evidently trying to create the impression of grave danger in Germany and that the Ebert Scheidemann government may be overthrown within a few days. As a result they are throwing out feelers to find out if the Allies will be willing to sign the treaty with the Independent Socialists.

Paris, May 21.—President Wilson, Lloyd George and other members of the "big five" met this morning for the purpose of considering recommendations for certain changes in the treaty which will make it more acceptable to the Germans. Recommendations made by the French economic experts had to do with reparations. The German delegation sought to deny the German responsibility for the war in a note on reparation, which was rejected last night, it was learned today.

Copenhagen, May 21.—The German reply to the allied peace terms will be handed to the big four Thursday, said a Berlin dispatch today. Germany will say she cannot accept the economic terms imposed by the Allies and will state that Austria as ally during the war is equally responsible in making reparation.

PASS WOMAN SUFFRAGE BILL

Washington, May 21.—The Woman Suffrage Amendment passed the House this afternoon, 304 to 88.

Washington, May 21.—The passage of the Woman Suffrage amendment before nightfall was predicted when the House convened today. The leaders of both parties had virtually reached an agreement to bring the amendment to a vote by 6:30 tonight.

Gray Wolf Killed Near Maryville.

Delbert Ambrose and Robert Pittsenbarger, residing about 8 miles southeast of Maryville killed a gray wolf on the Pittsenbarger farm about 7 o'clock yesterday morning. The men were walking along the road when they saw the animal. Ambrose went to his home and secured a rifle and with one shot ended its life.

Miss Nina Bent left today for Kansas City, where she will meet Miss Georgie Evans, who is en route from El Reno, Okla., where she has been teaching, to Colorado.

Mr. and Mrs. R. Kuchs returned yesterday noon after over a week's absence. Mr. Kuchs was in Texas on a business trip and Mrs. Kuchs visited in Kansas City and Excelsior Springs.

Mrs. S. L. Beech and daughters left this morning for Rock Port, where they will make their home. Mr. Beech left yesterday with the household goods.

WEATHER FOR TODAY

Fair and continued cool tonight; Thursday fair, somewhat warmer in the east and south portions.

MEMBER MISSOURI PRESS ASSOCIATION

ENGINEER HARPER'S REPORT.

(Continued from page 1)

an admirable location for such a storage tank as I have mentioned.

This would be built of reinforced concrete, 60 feet in diameter; 15 feet deep, capacity of 300,000 gallons with a concrete roof, and would be connected so that it can be filled from the city mains and kept full of filtered water all the time.

The fire pump, motor driven, capacity 1,000 gallon per minute against 100 pounds pressure would be located in the basement at the rear of the fire department building, and in case of fire can be started by the firemen before leaving the building.

There is an underground lead from the Light Plant through which power can be furnished to the motor, which would free the power line from the hazard of overhead pole line construction, and insure safety on this point, while the mains in the business district are so located that proper connection can be made thereto at small expense.

I think this is an ideal solution of your fire protection problem, both from the point of economy and efficiency.

Relining Basins at River.

It is advisable, tho not absolutely necessary, to reline the two small basins at the river plant, preferably with concrete, as shown on the plans herewith. The present lining is of brick and is in bad repair, but it is only fair to state that relining the basins will make no particular improvement in the quality of water.

Repairs to Dam.

The present high water has cut away a large part of the bank on the east side, below the dam, and there is immediate danger of the water cutting around this east end of the dam.

To make proper repairs, it will be necessary to drive a lot of piling below the dam, and use considerable riprap to protect the bank from further erosion.

Piling should also be driven to prevent a similar occurance on the west side of the river, below the dam, and a few piles should also be driven above the dam on the west side.

Repairs to Filter Plant.

The filters need considerable repair in the way of stopping several leaks, cleaning out all piping and strainers, and in making certain by-pass connections around some of the valves to permit them to be operated with less danger of breaking off valve stems.

Provision should also be made where by water for about 90 per cent of the filter washing can be taken direct from one of the small settling basins, instead of using, as at present, water which has been filtered and pumped to the city against 140 pounds pressure.

By proper pipe connections to the new centrifugal pump to be installed, this can be done, thereby considerably reducing the cost of washing the filters

Fire Proection for Normal School.

The Normal school is now served with water through a 2½ inch pipe line 1,800 feet long, which does not provide adequate pressure on the upper floors for the ordinary uses of water, at some periods during the day, and through which it is impossible to furnish any fire protection.

A 6 inch main should be laid direct to the Normal, through which plenty of water can be furnished both for the ordinary use at the Normal, as well as fire protection.

Estimated Cost.

The estimated cost of all the improvements which have been suggested in the report, including liberal allowances for Engineering, Supervision and Contingencies is $46,000.00.

Bond Issue.

I recommend that you issue bonds in the sum of $50,000.00 to defray the expense of making all the foregoing improvements.

Respectfully submitted,
E. E. HARPER.

CHAS. WILES ENJOYING HIMSELF IN FRANCE

Maryville Soldier Writes of Wonderful Visit to Nice, Famous French Watering Place.

Mrs. Carl Wiles has received the following interesting letter from her brother, Chas. Wiles:

Nice, May 4, 1919.

Dear Folks:

I arrived here yesterday at noon and am having a wonderful time. We rested yesterday afternoon and took in a show at the Y. M. C. A. Casino in the evening. This is a very beautiful building, built out into the sea. Nice is located on the Mediterranean sea and is a very beautiful city. It is one of the world's most famous watering places. We have the Mediterranean sea on one side and the Alps mountains on the other. The climate here is great. When we left Neufchateau is was cold and rainy. We had about an inch of snow on the ground. It sure seems funny to leave a climate like that and come into a land with flowers in bloom and oranges ripe on the trees. There are also beautiful palms here. I believe I could stay here a year and not want to go home. This part of the country really is Sunny France. The fellow that gave it this name never went any farther than this though. Well, this morning we took a trip up the Sea coast and visited Monaco and Menton, going over the Italian frontier a little ways. Coming back we came through the mountains which was a wonderful trip. The first stop was at Monaco, the little principality where the world renowned gambling Casino of Monte Carlo is located. We went through this Casino and saw the gambling tables. This is about the most wonderful building I was ever in. The people in Monaco do not pay any taxes, the revenue from this Casino keeps up the city. We also visited the Oceanographic Institute where we saw about a million different kinds of fish and other collections from the far north. From here we went to Menton and crossed the Italian frontier. I sent you several post cards with Italian stamps on them. The trip coming back through the mountains was very interesting. One place we saw an old monument erected by the Romans, which was built about 19 years B. C. We also saw many old castles which were interesting. I sure wish you were with me on this trip, I can't begin to describe the places to you. This leave will be worth thousands of dollars to me. The hotel we drew is not extraordinary but it will do. Some of the fellows are living like kings and I am not far behind them. We have another trip scheduled for tomorrow. It is Cannes and vicinity. These trips only cost us twenty francs each. I believe they could charge a hundred francs each and have just as many go on them.

Well, I will try to write you again soon, so will close this time.

Your brother,
CHAS. WILES.

Billiousness is a disorder involving the stomach, liver and bowels. It opens the door for disease. Prickly Ash Bitters is the right remedy. It drives out bile and impurities and makes a man feel bright, vigorous and cheerful. Price $1.25 per bottle.—Maryville Drug Co., Special Agents.—Adv.

BREWERIES READY TO RESUME OPERATION

Await Action of Congress on President's Message—Many Will Not Resume Manufacture of Beer.

St. Louis, May 21.—If congress acts promptly on the recommendation in President Wilson's message that the ban on beer and wine be lifted, brewing can be resumed at the Anheuser-Busch plant within twenty-four hours, according to August Busch, president of the brewing association. Many St. Louis breweries, however, are not in the same position, and it is doubtful if some of them will resume operation at all, in view of the fact that the dry amendment to the federal constitution goes into effect next January.

The recommendation in the Presidents' message refers to light wines and beer only. It is based on the president's belief that demobilization of the army has been carried to such an extent where the prohibition ban is no longer needed for war-time purposes. Congress previously had given the president authority to enforce the total prohibition ban in the event that demobilization was not completed. Under this order no brewing has been done at most St. Louis breweries since December 1, last. Some breweries, it is said, have gone ahead on the assumption that beer with less than 2¾ per cent of alcohol is not beer.

A torpid liver is a heavy handicap to a working man. It robs him of trength, energy and mental alertness To remove the burden the proper remedy is Prickly Ash Bitters. It is a fine liver, stomach and bowel medicine. Price $1.25 per bottle—Maryville Drug Co., Special Agents.—Adv.

BOY'S TROUUBLE COST MOTHER TEOUSANDS

Suffered Since He Was Two Years Old —Gains 16 Pounds On Tanlac.

"My nephew, James Hogan, who is fifteen years of age has gained sixteen pounds on Tanlac and is now a robust, happy boy after thirteen years of awful suffering," said Miss Maggie Goldsmith, 280 Henry Ave., Memphis, Tenn. Miss Goldsmith has been connected with the Joe L. Ullathorne Seed Co., of that city for twenty-seven years and is a stockholder and director in the company.

"Ever since James was two years old," continued Miss Goldsmith, "he has been afflicted with stomach trouble. Two or three hours after eating, especially the evening meal, he would begin to complain of severe pains in his stomach which would increase until he would go into convulsions. These spells would come on five or six times a month and last about thirty minutes and he would be unconscious for an hour. Some said he had heart trouble and others said it was vertigo. His condition kept him down to almost a skeleton and it was pitiful to see how he suffered.

"His mother took him to St. Louis, and many other places for treatment, and we spent thousands of dollars trying to find some relief for him but it was all to no avail.

"But all that awful load of anxiety and worry has been lifted. James is now a well and happy boy and is going to school, and a few bottles of Tanlac did it. He always complained of having to take other medicines but he seemed to like Tanlac and since taking five bottles he is sixteen pounds heavier and doesn't look like the same boy. He wants to eat all the time and can eat anything without it hurting him. It makes us repoice to see James well and stout and enjoying life like other boys. We are not looking for notoriety but for the sake of suffering humanity, we are willing to give our unqualified endorsement for Tanlac."

Tanlac is sold in Maryville by the Koch Pharmacy and by A. M. Colly, Conception Junction; H. M. Lincoln, Riekering, and Carter Pharmacy, Burington Junction, Mo., and in Barnard, by Bear Drug Store, in Elmo by King Drug Co., and in Clearmont by Dr. W. H. Wiley; Ravenwood by C. A. Shunk. —Adv.

Graham M. E. Church Notes.

Services next Sunday will be at Graham at 11 a. m. and Centenary at 8:30 p. m.

Services at Mt. Zion will be discontinued until a bridge near there is mended so the people can get to church

Everybody is welcome to all services.

ROLLIE POE, Pastor.

WOMEN ARE CARELESS.

This has been proved over and over again during the war. They overestimate their physical strength and overtax it. Their ambition is commendable but does not compensate for the hours and days of misery which they suffer from symptoms caused by female ills brought on by overwork. Women who are weak, nervous, despondent with headaches, backache and dragging-down [illegible] remember there is one tried and true remedy that is [illegible] Pinkham's Vegetable Compound, now recommended as the standard remedy for [illegible] ailments.—Adv.

Refreshing flavor and fragrance and unusual mellow-mildness make Camel Cigarettes instantly and permanently likable!

Camels are sold everywhere in scientifically sealed packages of 20 cigarettes; or ten packages (200 cigarettes) in a glassine-paper-covered carton. We strongly recommend this carton for the home or office supply or when you travel.

18 cents a package

CAMELS are a cigarette revelation! They are a smoke delight! They answer the cigarette question as it has never before been answered. Your taste will prove that!

Camels are an expert blend of choice Turkish and choice Domestic tobaccos which you will greatly prefer to either kind of tobacco smoked straight. Your test proves that!

This expert blend brings out Camels' wonderful cigarette qualities. It eliminates any unpleasant cigaretty aftertaste or any unpleasant cigaretty odor! It also makes possible Camels' enticing mildness while retaining the full "body" of the tobaccos.

No matter how much you like Camels and how liberally you smoke them, *they will not tire your taste!*

For your own satisfaction compare Camels with any cigarette in the world at any price!

BOARD OF EQUALIZATION TO ANNOUNCE ASSESSMENTS

Increase in Valuations of 20 to 25 Per Cent Over Last Year—Announcement Within Week.

Jefferson City, May 21.—There is but little doubt now that the State Board of Equalization will in a few days announce assessment of the real and personal property of the state.

There will be an increase over the valuations of last year of 20 to 25 per ent and the figures returned by the ate Tax Commission will be ignored as hey were last year.

The total fixed last year for real and personal property by the State Board was approximately $2,000,000. With the natural normal increase plus the 20 per cent to be put on by the board the total this year will be close to $2,500,000 as against the ull assessment figures of $4,000,000,000 reported by the Tax.

Following this will be assessment of he railroad, birdge, telegraph, telephone and other corporate property which will run the State up to approximately $3,000,000,000.

Announcement of the figures on the equalization of the real and personal property is expected some time during he present week.

PHONES—OFFICE 42. HOME 683

Rebekah Lodge.

The Rebekah Lodge requests the members to be present tomorrow night at 8 o'clock in I. O. O. F. hall.

Entertains Class.

Mrs. J. B. Robinson entertained the members of her Sunday school class of the Christian church Monday night. A business meeting was held and the remainder of the time was spent socially.

Dinner Guests.

Mr. and Mrs. Roy Wolfers entertained with a six o'clock dinner Sunday night at their home in Pickering. Their guests were Mr. and Mrs. A. Neil Somerville, W. N. Deatheridge and Fred Wolfers of Maryville, Mrs. N. C. McKibban of Omaha and Miss Mary Wolfers.

Line Party.

A line party was given last night at the Empire, after which refreshments were served at Reuillard's. Those in the party were Gertrude Conn, Merle Miller, Mildred Nute, Lena Tunnel, Claudine Woollen, Sue Shisler, Gustina Dills, Opal Hankins, Fern Campbell and Ruby Ewing.

Birthday Dinner.

Mr. and Mrs. Lawrence Ogden entertained at a dinner party last evening to observe the birthday anniversary of Mr. Ogden's father, Eugene Ogden. Covers were laid for Mr. and Mrs. Eugene Ogden, Mr. and Mrs. Bruce Montgomery and daughter, Jean; Mr. and Mrs. J. F. Montgomery, Mr. Grant, Homer Ogden and the host and hostess.

Wesleyan Bible Class.

The Wesleyan Bible class of the First M. E. Church met last night at the home of Mrs. Harry Mutz. At the conclusion of a business session, the time was spent socially and refreshments were served by the hostess and her sister, Msis Ilene Kemp. The visitors for the evening were Miss Kemp and Mrs. Ernest Robinson of Springfield, Mo., who is the guest of Miss Ruth Matter.

Westminster Guild.

The last meeting of the year of the Westminster Guild was held last night at the home of Miss Leona Willard, with Miss Margaret Lee Winston as assisting hostess. The program included vocal solos by Mrs. C. Edwin Wells, Mrs. E. T. Rasmussen and Miss Helen Zenor, and a reading on "Home Missionary Workers," by Miss Mildred Evans. At the conclusion of the program refreshments were served by the hostesses. The visitors for the evening were Mrs. C. Edwin Wells, Mrs. Florence Staples, Mrs. E. T. Rasmussen of Riverton, Neb., who is visiting her parents, Mr. and Mrs. H. T. Crane; Mrs. Brown and Mrs. J. F. Cook. The Guild is planning a picnic in June at Normal park.

Mary Lawrence Circle.

Miss Grace Langan and Miss Gertrude Condon entertained the Mary Lawrence Circle of the Christian church last night at the home of Miss Langan on West Second street. Miss Addie Hunter, with "Women Working Together" as her subject, led the meeting. Miss Ida Bosch, Miss Marie Reuillard and Miss Thella Hogue read papers on the subject of the evening. A letter from Mrs. J. D. Frank of Livingston, Texas, a former member of the Circle, was read by Miss Condon. Miss Anna Bainum, Miss Marjorie Hartman, Miss Bosch and Miss Allen Willis were guests of the circle.

Sunday Dinner.

Mr. and Mrs. Clarence Bailey entertained at dinner Sunday at their country home in honor of Arthur Bosley, who has just returned from Creighton, S. D. Plates were laid for Mr. Bosley, Mr. and Mrs. Wm. Eib, Mr. and Mrs. Wm. Bosley, Mr. and Mrs. Frank Bailey, Mr and Mrs. Marion Lugar, Mr. and Mrs Homer Worl, Albert Bosley, Frauline, Irene, Dorothy and Harrell Bailey, Lavern and Doris Thelma Worl, Alfred and Marion Eugene Lugar, Mary Oakerson, Mildred, Floyd, Clara Opal, Orville and Clifford Bailey, and the host and hostess.

M. I. Circle.

The M. I. Circle met with Mrs. J. D. Ford, at her home on North Buchanan street, yesterday afternoon. Devotions were led by Mrs. J. F. Cook, and Mrs. J. W. Ray was in charge of the program. The leader read a paper on "Pioneer Days in Nodaway County and Maryville," and referred to the first churches and the rural schools in the county as they were in those days. She also read some poetry composed by Mrs. Will Price. A poem entitled, "The Fightin' Funston Gang," was read by Mrs. Ford. A prophecy of the Circle, given by Mrs. Cook, concluded the program. Mrs. Warren Jones and Mrs. Bratcher were visitors for the afternoon.

Children's Party.

Mariam and Halbert Catterson entertained a number of their little friends yesterday afternoon at the home of their parents, Mr. and Mrs. Hal Catterson, 1510 North Main street. The afternoon was spent in games, after which refreshments were served by Mrs. Catterson, assisted by Mrs. John Wilson and Mrs. Wm. Mountjoy. The guests were Mary Coe, Katherine McMillan Laura Margaret Raines. Margaret Louise Hosmer, Lora Mae Crossan, Eva Margaret Frank, Esther Roseberry Katherine Rathbun, Edwyna Forsyth Virginia Belle Dean, Genevieve and Mary Todd, Mary Gex, Olive Ewing Mary Elizabeth Jones, Lucile Gaugh Elizabeth Beech, Mary Donna and Graham Malotte, Robert and John Edward Mountjoy, John Frazee and Curtis Coe.

Charivari Newlyweds.

A party of friends charivaried Mr. and Mrs. Virgil Hartness at their home last night. Mr. Hartness and his bride returned Saturday night from a short honeymoon trip and are at home at 303 Park Avenue.

If in need of Glasses call on an exclusive Doctor of Optics, who is competent. JOHN LE GRAND BAKER is Maryville's exclusive efficient Doctor of Optics. 2 blocks west of Postoffice.

SUGGEST $65,000 BOND ISSUE

(Continued from page 1)

Mr. Ford stated that a short time before the city took over the water plant, the owners of the plant had figured on spending $75,000 for improvements and new machinery at the plant if they could get the rate necessary. He pointed out that the city had only $50,000 to do this work from their bond issue and that the plant was even in worse condition when taken over by the city than the owners thought.

R. L. McDougal, another member of the former Board of Public Works, expressed practically the same sentiments on the question and spoke in favor of the $65,000 issue. "The plan suggested by Mr. Harper is obviously the correct one," he said, "and no time is better than the present for definite action."

The plan was indorsed by several other prominent men of the city, among them Mayor Garrett and G. B. Roseberry, members of the present Board of Commissioners. G. L. Wilfley chairman of the meeting, called at random for the sentiment of the various citizens, and without exception favor was expressed for the issuance of the bonds

Preceding the discussion of the bond issue last night a report was read by E. E. Harper, the Kansas City Engineer who has been selected by the city to plan and devise the proper ways and means of improving the water system.

Mr. Harper gave a summary of the plan, omitting all technical language, and illustrating the various points on a blue print diagram. The principal features which he brought out were the increased storage of the plant, better fire protection, and of "paramount importance" as Mr. Harper said, the increased purity of the water. The engineer explained that the latter phase was one of the most important from the standpoint of the public health, and that it was his aim to furnish the purest water possible to Maryville.

In the course of his talk, Mr. Harper gave a demonstration of the effect of the chemicals which are put into the water by the present system, and then showed how he would remedy the fault. Taking two jars of muddy water which he had secured from the river, he placed a quantity of alum and lime in each. In one he stirred the contents, while the other was left quiet. Within a very short time the water which had been stirred, began to clear up and the mud and sediment settled to the bottom while in the other the foreign substances remained in suspension. By this experiment, Mr. Harper showed the necessity of thoroughly mixing the coagulants with the water—a thing which is not efficiently done at the present time and for which provisions have been made in the new plant.

After the report had been given, questions were asked on various phases of the problem by the citizens, which were explained by the engineer.

Before going to the church last night, about 40 citizens visited the water plant and river, and inspected the present system. Mr. Harper personally explained where the various changes were to be made and the manner in which he proposed to make the improvements.

The dinner last night was put on under the auspices of the Commercial Club and was served in the ante room of the Christian church, by the women of the church. An excellent emal was prepared by the women and the keen interest which is being felt in the big water problem was indicated by the large number who remained to hear the discussion following the dinner.

The commissioners will meet within the next few days to set aside an election day for the purpose of voting on the proposition. It is necessary to have a two-thirds majority to carry.

You Can't Cure Rheumatism With Liniments and Lotions

Torturing Pains Promptly Return in All Their Intensity

You may as well throw your liniments to the winds, if you expect them to rid you of the pangs of rheumatism. In fact, the sooner you discard forever the use of all forms of local treatment, the sooner you will get on the right track which leads to rational means of relief.

For you can rub and rub from now until doomsday, and you will never make any progress toward ridding yourself of rheumatism, because such treatment does not approach the source of the disease.

Remember from the outset that the pangs of rheumatism come from a deepseated cause, and that simply rubbing the painful parts of the body has no effect on the disease itself. But when you locate the cause of the disease, the real source of all these intense pains, you can then treat the disease intelligently.

And until you do treat your rheumatism intelligently, you will never be free from its disabling pains.

So many people have found real, genuine and lasting relief from rheumatism by purifying the blood with S. S. S. that we are justified in recommending this splendid remedy to all who are afflicted. Perhaps your case is like thousands of others which are caused by millions of tiny disease germs in the blood. S. S. S. so thoroughly cleanses the blood, that it routs out completely and eliminates all disease germs that infest it.

In this way the source of the disease is reached, and its cause removed. Give your system a thorough cleansing with this reliable vegetable blood remedy, and you will be delighted to be free of the pangs of rheumatism. It has been used for more than fifty years and is sold at all drug stores. Begin its use today and you will have the same satisfactory experience as thousands of other sufferers.

Should you wish special advice about your own case, it can be had without cost by writing to Chief Medical Adviser, 101 Swift Laboratory, Atlanta, Ga.

Trade Mark

LEONARD EAR OIL

Relieves Deafness, Stops Head Noises

Nine out of ten cases of Deafness and Head Noises are caused by catarrhal mucous (matter) in the Eustachian Tube, which connects the nose and the ears. Leonard Ear Oil removes the mucous, opens up the tube and the other air passages of the head, and the result is improved Hearing and relief from Head Noises. It is not put in the ears, but is "Rubbed in Back of the Ears" and inserted in the nostrils, and "Common Sense Directions for Care of Hearing," which accompanies each bottle, tell you exactly how to take care of your own case. Do not be misled by substitutes or imitations. The only genuine "EAR OIL" is A. O. Leonard Ear Oil. It is the original and has been on the market since 1907, and every year it has relieved hundreds of people of their Ear Troubles. No matter how long you have been deaf, nor how deaf you are or what caused your deafness, or how many things you have already tried which have failed to relieve you, Leonard Ear Oil has relieved many such cases as your own. Why not you?

LEONARD EAR OIL AGENCY

A Testimonial That Has Been SWORN TO

11-13-18.

Dear Mr. Leonard—Having had my hearing completely restored by Leonard Ear Oil, I feel it an obligation to let you and others know what it has done for me. My deafness was caused by catarrh and I had been growing worse for years. I had become so deaf I was considering giving up my regular business because of my deafness. It was necessary for me to hear well in my regular work. After using less than two bottles of Leonard Ear Oil I hear as well as ever and am still on my job. Sincelely yours, JOSEPH A. STAFFORD, 531 West 145th St., New York City.

Subscribed and sworn to before me this 13th day of November, 1918. Joseph Braman, Notary Public No. 221, City and County of New York.

SPRING FEVER

Following Colds, Grippe, Thin, Watery or Poisoned Blood

(By Dr. Valentine Mott.)

At this time of year most people suffer from what we term "spring fever" because of a stagnant condition of the blood, because of the toxic poisons stored up within the body during the long winter. We eat too much meat, with little or no green vegetables.

Bloodless people, thin, anemic people, those with pale cheeks and lips, who have a poor appetite and feel that tired, worn or feverish condition in the springtime of the year, should try the refreshing tonic powers of a good alterative and blood purifier. Such a tonic as druggists have sold for fifty years, is Doctor Pierce's Golden Medical Discovery. It is a standard remedy that can be obtained in tablet or liquid form. Made without alcohol from wild roots and barks.

Occasionally one should "clean house" with castor oil or tiny pills made up of the May-apple, leaves of aloe and jalap, and sold by almost all druggists in this country as Doctor Pierce's Pleasant Pellets.

Boulder, Colo.—"About seventeen years ago I was given up by home physicians. I was discouraged, but hearing of Dr. Pierce's wonderful Golden Medical Discovery thought I would give it a trial. I coughed night and day, but after taking the third bottle of the 'Discovery' the cough began to cease and I lay down for the first night's sleep in six weeks. I then wrote to Dr. Pierce and took specially prepared medicines for about three months. I also kept taking the 'Golden Medical Discovery' during this time and continued for one year. I can safely recommend ... to all." ... O. J. Adams.

Velvet

THE FRIENDLY TOBACCO

THERE may be some things that can be done well in a hurry, but pickin' a wife an' agein' a tobacco ain't amongst 'em.

Velvet Joe.

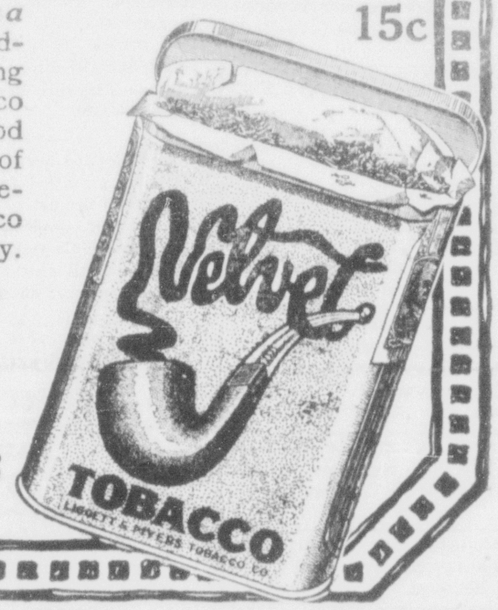
We put away millions of pounds of fine Kentucky Burley tobacco every year, stored in wooden hogsheads. It ripens two years. When we take it out it's ***different***—Nature has improved it, good as it was—made it ***friendlier,*** more fragrant, cool-smoking, long-burning.

Nature has given it a ***delicious*** quality of mildness and fragrance that no artificial means can ever equal.

It's just that *extra* touch of friendly goodness that is building up VELVET Tobacco into the favor and good will of thousands of pipe smokers who prefer to smoke tobacco cured in Nature's way.

You would notice the difference.

15c



Liggett & Myers Tobacco Co.

Roll a VELVET Cigarette

VELVET'S nature-aged mildness and smoothness make it just right for cigarettes.

Protect your Barn with Cooks Prairied Barn Paint... Gaugh & Evans. tf

ADDITIONAL ALLOWANCE FOR TRAVEL IS GRANTED.

Washington, D. C.—Having practically completed the $60 bonus payments to discharged soldiers from the army, so far as demobilization has progressed to date, the War Department's Director of Finance is now settling additional travel allowances due enlisted men under the act of Congress approved February 28, 1919. Under this act, settlement is to be made on the basis of five cents a mile to actual bona fide home, residence or place of muster into the service, at the option of the soldier.

Under this act, the soldier receives an additional allowance of one and a half cents per mile, and all soldiers who were mustered out before payment of this allowance was begun are entitled to the additional amount, upon filing claim with the auditor of the War Department.

A blank form of application, which includes the necessary affidavit for the additional travel allowance, may be obtained from any army recruiting officer, the Red Cross or other agency organized to aid soldiers. This affidavit must be accompanied by a true copy of the soldier's discharge certificate, which will be returned with the check.

While payment will be made on the original discharge certificate, claimants ade advised that the use of a copy will eliminate the possibility of the loss of the original. A certified copy of discharge certificate submitted for payment of the $60 discharge bonus and now on file in the Zone Finance Office will be accepted in lieu of other copies or original certificate. Men who have submitted these certified copies should so state when forwarding claim.

In the payment of the $60 bonus granted by the Government to discharged men, the Director of Finance has paid out more than $800,000,000, as the number of discharges up to this time have approximated 1,400,000.

J. F. Montgomery returned this morning from a visit in Chicago.

Card of Thanks.

VON ETZEL "ON THE RUN."

New York, May 21.—In the Summer of 1917 General Pershing went to the Verdun front to witness the smart French attack that swept the Germans back from Dead Man's Hill and firmly re-established French positions northwest of the fortress city.

Arriving there he found that by good fortune the French officer commanding the operation, and his host, was Colonel Corvissart. Corvissart was French military attache with General Kuroki's army in the Russo-Japanese war; Pershing was American attache, and the two were great friends. They went to the front and from an observation post watched the progress of the attack and finally saw the Germans late in the afternoon begin falling back before the advance of the poilus.

"By the way," said General Pershing as they started back to corps headquarters. "I onwder whatever became of old Von Etzel, the German military attache with Kuroki. Remember him? We all disliked him so."

"Von Etzel?" laughed Colonel Corvissart, "why, that's Von Etzel's army my poilus are driving back over that hill."

Dr. Lorace Catterson of Duluth, Minn., arrived yesterday to spend several weeks with his mother, Mrs. Omer Catterson.

About Homer Croy.

The following paragraph is from a letter from Lee Shippy in Paris to the Columbia Evening Missourian:

"The first Missourian of interest to Missouri University and the typewriter tapping profession I met over here was Homer Croy. Before he degenerated into a novelist Homer worked on The Post-Dispatch, just after leaving the university, but he wasn't quite bright enough for the newspaper business, so he fell first to magazine work with Leslies and then to writing books. Over here he has been one of the bosses of the cinema department of the Y. M. C. A. which just now is giving more than 4,000 showings a week for the A. E. F. He is about to return to America, as there isn't a bed in France quite long enough for him, and after eight months of sleeping curved up, he feels an overwhelming desire to go home and straigh ten out. It was not so bad in winter, but now that the warm weather is here he can no longer stand doubling in brass beds."

F. M. Townsend left this morning for Denver, Colo., to join his wife, who is visiting her parents, Mr. and Mrs. Henry Bohm.

The Caroline Islands number more than five hundred. In 1911 the total population was about 55,000, and of these fewer than 400 were Europeans.

DETECTIVE ON PROGRAM

Harry J. Loose of Chicago, on Chautauqua Platform, Here This Summer.

Harry J. Loose, the Chicago detective, who is to appear on our Chautauqua program this summer, is city born and city bred. All of his work has been done in and about Chicago. He cheerfully admits his ignorance regarding conditions in other sections than the Chicago district.

When the Redpath-Vawter folks notified him that part of the summer would be spent in Minnesota and South Dakota he wrote to the office regarding what clothing he should wear.

"I am a city worm entirely," he wrote, "and know little about the country as a whole. All I know of the Dakotas is what I read as a boy in "Deadwood Dick's Last Hope or the Redskin's Revenge." This volume did not mention anything about the weather as I recall. The deepest impressions I received from it was that that part of the world was safer for bald-headed men. I am such a new bird in the chautauqua aviary and have so much to learn that I would be grateful for any information that would be of service.

Mr. Loose declares that his twenty years connection with the Chicago police force has convinced him that "they never get away." This is the dominant thought of his address and one which should cause every lad contemplating life of crime to reflect upon—"They never get away."

FOR UNITY OF ACTION.

Divided leadership hindered and perhaps prevented allied success in the great war for nearly four years. Time after time great opportunities were lost through lack of co-ordination between the different allied armies. There was no unity of command because the allied nations were not willing to make the sacrifice of individuality which the appointment of a generalissimo required. Then came the great German drive in Picardy last March; after that the question of a single command ceased to be a matter for discussion and became a matter of life and death necessity. It was not until the allied cause had been pushed to the edge of the precipice that Foch was given the supreme command. Today we all know what that appointment meant to the future of mankind.

Missouri has suffered to some extent from divided command and lack of coordination. The time has come when this condition must be ended.

The Federation of Missouri Commercial Clubs, enjoying, as it does, the confidence of rural Missouri, working quietly and effectively through local units might well be the ideal organization through which to work for greater state development. Civic soldiers recruited from its ranks put Missouri "over the top" in every campaign connected with the winning of the war. The state university, the normal schools, the school of mines, the college of agriculture and the state highway board, realizing the power and influence of the federation throughout the state, have always worked with that organization, largely because of its ability to get things done without monopolizing the spotlight. The war is over in fact, if not in law, and it is up to all Missourians to give "Wheregas" a rest and get busy.

A struggle for growth and development among the various states is sure to begin with the coming of peace. Missouri must unite forces and prepare to tackle the future as a unit. A central organization such as the Federation of Missouri Commercial Clubs, supported by the educational, agricultural, industrial, business and professional forces of Missouri, can be of tremendous service to the state in the strenuous years of after-the-war readjustment. Missouri, already a great state, despite the knocking of its disloyal newspapers, can become a greater state thru the better co-ordination of its varied activities.—St. Louis Times.

The Big Tent Theatre was well filled last night by a delighted audience.
